

Fund description and summary of investment policy

The Fund is an actively managed exchange-traded fund and invests only in the Orbis Global Equity Fund, managed by Allan Gray's offshore investment partner, Orbis Investment Management Limited. The Orbis Global Equity Fund is designed to be exposed to all of the risks and rewards of selected global shares. Returns are likely to be volatile, especially over short- and medium-term periods. Although the Fund's investment universe is global, the units of the Fund are priced and traded daily in rands.

The Fund is managed in the same way as the Allan Gray - Orbis Global Equity Feeder Fund, although the latter is not listed on the JSE. The since-inception track record of the Allan Gray - Orbis Global Equity Feeder Fund is available on the [Allan Gray website](#).

ASISA unit trust category: Global – Equity – General

Fund objective and benchmark

The Fund aims to outperform global stock markets over the long term, without taking on greater risk. Its benchmark is the MSCI World Index, including income, after withholding taxes.

How we aim to achieve the Fund's objective

The Fund invests only in the Orbis Global Equity Fund. The Orbis Global Equity Fund is designed to be exposed to all of the risks and rewards of selected global shares. Orbis uses in-house research to identify companies around the world whose shares can be purchased for less than Orbis' assessment of their long-term intrinsic value. This long-term perspective enables Orbis to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. This is the same approach as that used by Allan Gray to invest in South African equities, except that Orbis is able to choose from many more shares, listed internationally.

Suitable for those investors who

- Seek exposure to diversified international equities to provide long-term capital growth
- Wish to invest in international assets through a rand-denominated fund
- Are comfortable with global stock market and currency fluctuation and risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as a global equity "building block" in a diversified multi-asset class portfolio

Meeting the Fund objective

The Fund may experience periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the global stock market.

Fund information on 30 June 2026

Fund size	R0.1bn
Number of units	9 282 430
Price (net asset value per unit)	R11.55
JSE code	AGOGF
ISIN	ZAE000343489

Performance

The Fund was launched on 11 December 2025. We will report its performance information from 31 December 2026.

Fund availability

The Fund may be closed to new investors in certain circumstances, such as where regulatory constraints are placed on the Management Company or the Fund, or where the Orbis Global Equity Fund is closed to new investments. This will be done to manage the Fund according to its mandate. Please visit our website or contact our Client Service Centre for further information about any constraints that may apply.

Income distributions

To the extent that income in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus annually (December).

The income accrued from inception to 31 December 2025 was not sufficient to justify a distribution and will be carried forward and included in the next distribution.

Annual investment management fee

Allan Gray does not charge an annual management fee but is paid a marketing and distribution fee by Orbis. Orbis charges a unique refundable performance-based fee in the Orbis Global Equity Fund which is designed to align Orbis’ interest with investor outcomes. The fee consists of a base fee and a refundable performance fee. In traditional fee structures, the total fee is paid to the manager immediately. When the Orbis fund outperforms, the performance fee is paid into a fee reserve and enables Orbis to refund investors if the Orbis fund subsequently underperforms. The table below summarises the fee parameters.

Initial, exit and switching fees	0.00%
Base fee	1.10% per annum
Performance fee sharing rate	25% for out- and underperformance relative to the benchmark.
Performance fee benchmark	MSCI World Index, including income, after withholding taxes.
Fee reserve	Performance fees available for refund will be shown below the TER table. ⁴

The fee is calculated daily. After deducting the base fee, the fund’s performance is compared to its benchmark. Orbis then shares in 25% of the value added or lost relative to the benchmark. This means the fee adjusts by 0.25% for every 1% of outperformance or underperformance.

The fee is uncapped when the Orbis fund outperforms. However, during periods of underperformance, the total fee can be negative, as performance fees can be refunded from the fee reserve. If the reserve is empty and underperformance continues, a high watermark ensures that fees are only charged once previous losses are recovered. The fee experience table illustrates what investors can expect during periods of out- and underperformance. When the fee reserve is positive, Orbis may earn one-third of the available performance fees, subject to a cap of 2.50% per year. For more information, please refer to the [fees resources](#) section of the Orbis website.

Fee experience

Out- and underperformance scenarios	+8%	+4%	0%	-4%	-8%
Base fee	1.1%	1.1%	1.1%	1.1%	1.1%
Performance fee or refund*	1.7%	0.7%	-0.3%	-1.3%	-2.3%
Total annual management fee	2.8%	1.8%	0.8%	-0.2%	-1.2%

*Illustrative only. If there is no refund available, the base fee is still charged.

Total expense ratio (TER) and transaction costs

The annual management fee charged by Orbis is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one- and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Asset allocation on 30 June 2026¹

Asset class	Total	United States	UK	Europe ex-UK ²	Japan	Other ²	Emerging Markets
Net equities	94.9	43.9	13.3	8.8	2.2	5.6	21.1
Property	2.5	0.0	0.0	0.0	1.9	0.6	0.0
Money market and cash	2.6	1.7	-0.2	0.0	0.0	0.0	1.0
Total (%)	100.0	45.6	13.1	8.8	4.1	6.2	22.1
Currency exposure	100.0	46.4	8.3	8.9	7.6	10.3	18.5
Benchmark	100.0	72.5	3.5	12.3	5.7	6.1	0.0

1. Refers to the asset allocation of the underlying Orbis Global Equity Fund.

2. Refers to developed markets only.

Note: There may be slight discrepancies in the totals due to rounding.

Total expense ratio (TER) and transaction costs for periods ending 30 June 2026 (updated quarterly)³

1- and 3-year TER and transaction costs breakdown	1yr %	3yr %
Total expense ratio	4.52	3.06
Fee for benchmark performance	1.10	1.10
Performance fees ⁴	3.35	1.90
Other costs excluding transaction costs	0.07	0.07
VAT	0.00	0.00
Transaction costs (including VAT)	0.16	0.13
Total investment charge⁵	4.68	3.19

3. The total expense ratio (TER) and transaction costs shown are estimates based on the past performance of the Allan Gray - Orbis Global Equity Feeder Fund. This fund shares the same investment policy, objective and benchmark. Actual TER data will be used from one year after the Fund’s inception.

4. As at 30 June 2026, performance fees of 4.0% were available for refund in the event of subsequent underperformance.

5. The total investment charge excludes the costs of trading via the JSE, which are borne by the investor.

Samsung Electronics	3.6
Booking Holdings	2.9
Alphabet	2.6
RXO	2.4
Bruker	2.3
Motorola Solutions	2.3
Total (%)	32.0

In the first half of 2026, the Orbis Global Equity Fund outperformed the MSCI All Country World Index (the Index) by approximately 7% net of fees. But we did not earn it by sitting still. Market breadth was among the narrowest on record: In April and May, only one in four stocks in the Index outperformed it. When three out of four stocks in the market are hay, finding the needles is harder and more valuable. Every position must earn its keep.

The biggest winners have been concentrated in artificial intelligence (AI). But not all AI exposure is equal. We frame ours in four groups. The first is the "Core": direct exposure through companies like Samsung Electronics, Taiwan Semiconductor Manufacturing Company and SK Square. The second is "Enablers": the businesses providing the power, materials and real estate that hyperscalers need to operate. The third is AI "Powered": companies where AI accelerates an already compelling model, like Alphabet. The fourth is the "Overlooked": resilient businesses the market has mispriced as AI casualties. The first three are widely understood. The fourth is where we believe the market is most wrong, and where we are hunting.

Take insurance brokerage. Brown & Brown and Ryan Specialty are brokers: They sit between companies and insurers, matching clients to the right coverage and placing it for a fee, without carrying the risk themselves. Both are priced as AI casualties. Two fears weigh on the stocks: a softening pricing cycle and AI disintermediation. The pricing cycle is already in the price. On AI, we disagree.

AI may automate commodity cover like personal auto, but that is under 5% of Brown & Brown's book. The rest is commercial and speciality insurance, where the broker exercises judgement and answers for a denied claim. It is a people business, and Brown & Brown has spent more than 80 years serving mid-sized companies that lack in-house insurance expertise.

Ryan Specialty makes the case from the other end of the market: a leading specialist in excess and surplus, the part of insurance built for complex, hard-to-place and emerging risk. That market is structurally expanding, and we view Ryan as its most capable navigator.

The pattern holds across the Overlooked. We are not buying businesses AI leaves alone. We are buying businesses that put AI to work. Scaled brokers with proprietary data are sharpened by it, not replaced.

The same logic reaches well beyond insurance. In any industry, the dividing line is rarely whether a company adopts new technology. It is how. We have seen this before.

When electric motors arrived in factories at the turn of the last century, most owners did the obvious thing: They ripped out the central steam engine and dropped in an electric motor. Productivity improved modestly. Nothing fundamental changed.

The real gains came later. Manufacturers realised they no longer needed to organise the factory around the power source. Smaller motors could be distributed to individual machines, and the floor redesigned around workflow rather than around the engine room. That redesign was where the value was created, not the motor itself.

We think about AI through the same lens. Most early corporate AI adoption is a motor swap: existing workflows, existing structures, existing assumptions, with AI bolted on. The companies that compound the most value are those willing to redesign the floor. This is a question I ask of every management team I invest behind. QXO is doing exactly that. As it consolidates the prosaic, low-tech business of building-products distribution, it is rebuilding the operating model itself, from pricing and procurement to inventory and branch data, rather than bolting technology onto the old way of working.

We apply the same standard to ourselves. We have wired over two decades of internal research into AI, making the firm's accumulated knowledge searchable for every analyst. It's valuable, but a motor swap. The deeper ambition is improving our decision-making. We are turning years of analyst decisions and investment reasoning into a dataset we can learn from, identifying where our research engine adds the most value and where our reasoning has led us astray. The goal is not to replace our stockpickers' judgement. It is to raise the ceiling on what they can do. We are in the early stages. We are adapting how we work, not our principles. In time, we believe it can make us better stewards of your capital.

Our founder, Allan W B Gray, had a phrase many of us still live by: "Strong convictions, loosely held." It means conviction grounded in evidence over emotion, and adapting your view when the facts change.

The owners who won the electrical age were not those who believed most strongly in electricity, but those who held their old assumptions loosely enough to rebuild around a new reality. The same holds true today. Geopolitical realignment, shifting trade and generational technology are all in motion at once. And we do not pretend to know how they resolve. The job is not to predict. It is to build a portfolio that benefits more from being right than it suffers from being wrong.

I am encouraged by our performance this year. But it is too early to celebrate. The environment will keep testing us. What I cannot know is what markets will do; they rarely co-operate with forecasts. What I do know: Our own money is invested alongside yours.

We will continue to act with discipline, independence and patience. Strong convictions, loosely held.

In the last quarter, we initiated a position in Booking Holdings, a US-based online travel and accommodation booking company, and reduced our positions in SK Square and Samsung Electronics into relative share price strength.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates actively managed exchange-traded funds under the Allan Gray ETF Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray ETF Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

More detail regarding the Fund is provided in its [pricing supplement](#) and the [Programme Memorandum](#). Please ensure that you read this minimum disclosure document in conjunction with these documents. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 17:00 each business day. Final net asset value prices are available daily on www.allangray.co.za, with intraday prices published three times a day. Exchange-traded funds can also be traded intraday on the JSE during exchange trading hours. (Intraday trading is not possible via Allan Gray.) Trading on the JSE will incur additional costs such as the bid/offer spread (not exceeding 0.80% of the intraday price), brokerage and Strate fees.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Feeder AMETF

A feeder AMETF is an actively managed exchange-traded fund that invests in a single unit trust, which charges its own fees. Allan Gray does not charge any additional fees in its feeder funds.

Actively managed exchange-traded funds (AMETFs) vs unlisted unit trusts

An AMETF is registered as a unit trust and governed by the Collective Investment Schemes Control Act 45 of 2002 in the same way as an unlisted unit trust. AMETFs are listed on an exchange, such as the Johannesburg Stock Exchange (JSE), and can be traded continuously throughout exchange trading hours via the JSE. On the other hand, unlisted unit trusts can only be traded once a day.

Foreign securities

The Orbis Global Equity Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

MSCI Index
