

Fund description and summary of investment policy

The Fund is a feeder fund and invests only in the Orbis Global Equity Fund, managed by Allan Gray's offshore investment partner, Orbis Investment Management Limited. The Orbis Global Equity Fund is designed to be exposed to all of the risks and rewards of selected global shares. Returns are likely to be volatile, especially over short- and medium-term periods. Although the Fund's investment universe is global, the units in the Fund are priced and traded daily in rands.

ASISA unit trust category: Global – Equity – General

Fund objective and benchmark

The Fund aims to outperform global stock markets over the long term, without taking on greater risk. Its benchmark is the MSCI World Index, including income, after withholding taxes.

How we aim to achieve the Fund's objective

The Fund invests only in the Orbis Global Equity Fund. The Orbis Global Equity Fund is designed to be exposed to all of the risks and rewards of selected global shares. Orbis uses in-house research to identify companies around the world whose shares can be purchased for less than Orbis' assessment of their long-term intrinsic value. This long-term perspective enables Orbis to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. This is the same approach as that used by Allan Gray to invest in South African equities, except that Orbis is able to choose from many more shares, listed internationally.

Suitable for those investors who

- Seek exposure to diversified international equities to provide long-term capital growth
- Wish to invest in international assets through a rand-denominated fund
- Are comfortable with global stock market and currency fluctuation and risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as a global equity 'building block' in a diversified multi-asset class portfolio

Fund availability: Subject to offshore capacity constraints. Please visit our website or contact our Client Service Centre for further information about any constraints that may apply.

Meeting the Fund objective

Since inception and over the latest five-year period, the Fund has outperformed its benchmark. Over the latest 10-year period, the Fund has underperformed its benchmark. The Fund has provided returns in excess of CPI inflation for all three periods. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the global stock market. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Fund information on 31 July 2026

Fund size	R36.4bn
Number of units	183 307 006
Price (net asset value per unit)	R198.51
Class	A

- MSCI World Index, including income, after withholding taxes (source: Bloomberg), performance as calculated by Allan Gray as at 31 July 2026. From inception to 15 May 2023, the benchmark was the FTSE World Index, including income.
- This data reflects the latest available headline CPI inflation numbers for South Africa and the United States of America, as at 30 June 2026 (Source: Iress).
- Maximum percentage decline over any period. The maximum rand drawdown occurred from 6 June 2008 to 10 March 2009 and maximum benchmark drawdown occurred from 5 June 2008 to 6 March 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
- The percentage of calendar months in which the Fund produced a positive monthly rand return since inception.
- The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
- These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual rand return occurred during the 12 months ended 31 December 2013 and the benchmark's occurred during the 12 months ended 31 December 2013. The Fund's lowest annual rand return occurred during the 12 months ended 31 March 2009 and the benchmark's occurred during the 12 months ended 31 March 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus annually.	31 Dec 2025
Cents per unit	3.5042

Annual investment management fee

Allan Gray does not charge an annual management fee but is paid a marketing and distribution fee by Orbis. Orbis charges a unique refundable performance-based fee in the Orbis Global Equity Fund which is designed to align Orbis' interest with investor outcomes. The fee consists of a base fee and a refundable performance fee. In traditional fee structures, the total fee is paid to the manager immediately. When the Orbis fund outperforms, the performance fee is paid into a fee reserve and enables Orbis to refund investors if the Orbis fund subsequently underperforms. The table below summarises the fee parameters.

Initial, exit and switching fees	0.00%
Base fee	1.10% per annum
Performance fee sharing rate	25% for out- and underperformance relative to the benchmark.
Performance fee benchmark	MSCI World Index, including income, after withholding taxes.
Fee reserve	Performance fees available for refund are shown below the TER table. ⁹

The fee is calculated daily. After deducting the base fee, the fund's performance is compared to its benchmark. Orbis then shares in 25% of the value added or lost relative to the benchmark. This means the fee adjusts by 0.25% for every 1% of outperformance or underperformance.

The fee is uncapped when the Orbis fund outperforms. However, during periods of underperformance, the total fee can be negative, as performance fees can be refunded from the fee reserve. If the reserve is empty and underperformance continues, a high watermark ensures that fees are only charged once previous losses are recovered. The fee experience table illustrates what investors can expect during periods of out- and underperformance. When the fee reserve is positive, Orbis may earn one-third of the available performance fees, subject to a cap of 2.50% per year. For more information, please refer to the [fees resources](#) section of the Orbis website.

Fee experience

Out- and underperformance scenarios	+8%	+4%	0%	-4%	-8%
Base fee	1.1%	1.1%	1.1%	1.1%	1.1%
Performance fee or refund*	1.7%	0.7%	-0.3%	-1.3%	-2.3%
Total annual management fee	2.8%	1.8%	0.8%	-0.2%	-1.2%

*Illustrative only. If there is no refund available, the base fee is still charged.

Total expense ratio (TER) and transaction costs

The annual management fee charged by Orbis is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one- and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Asset allocation on 31 July 2026⁷

Asset class	Total	United States	UK	Europe ex-UK ⁸	Japan	Other ⁸	Emerging markets
Net equities	96.2	45.8	15.5	7.3	2.1	6.2	19.2

In the first half of 2026, the Orbis Global Equity Fund outperformed the MSCI All Country World Index (the Index) by approximately 7% net of fees. But we did not earn it by sitting still. Market breadth was among the narrowest on record: In April and May, only one in four stocks in the Index outperformed it. When three out of four stocks in the market are hay, finding the needles is harder and more valuable. Every position must earn its keep.

The biggest winners have been concentrated in artificial intelligence (AI). But not all AI exposure is equal. We frame ours in four groups. The first is the "Core": direct exposure through companies like Samsung Electronics, Taiwan Semiconductor Manufacturing Company and SK Square. The second is "Enablers": the businesses providing the power, materials and real estate that hyperscalers need to operate. The third is AI "Powered": companies where AI accelerates an already compelling model, like Alphabet. The fourth is the "Overlooked": resilient businesses the market has mispriced as AI casualties. The first three are widely understood. The fourth is where we believe the market is most wrong, and where we are hunting.

Take insurance brokerage. Brown & Brown and Ryan Specialty are brokers: They sit between companies and insurers, matching clients to the right coverage and placing it for a fee, without carrying the risk themselves. Both are priced as AI casualties. Two fears weigh on the stocks: a softening pricing cycle and AI disintermediation. The pricing cycle is already in the price. On AI, we disagree.

AI may automate commodity cover like personal auto, but that is under 5% of Brown & Brown's book. The rest is commercial and speciality insurance, where the broker exercises judgement and answers for a denied claim. It is a people business, and Brown & Brown has spent more than 80 years serving mid-sized companies that lack in-house insurance expertise.

Ryan Specialty makes the case from the other end of the market: a leading specialist in excess and surplus, the part of insurance built for complex, hard-to-place and emerging risk. That market is structurally expanding, and we view Ryan as its most capable navigator.

The pattern holds across the Overlooked. We are not buying businesses AI leaves alone. We are buying businesses that put AI to work. Scaled brokers with proprietary data are sharpened by it, not replaced.

The same logic reaches well beyond insurance. In any industry, the dividing line is rarely whether a company adopts new technology. It is how. We have seen this before.

When electric motors arrived in factories at the turn of the last century, most owners did the obvious thing: They ripped out the central steam engine and dropped in an electric motor. Productivity improved modestly. Nothing fundamental changed.

The real gains came later. Manufacturers realised they no longer needed to organise the factory around the power source. Smaller motors could be distributed to individual machines, and the floor redesigned around workflow rather than around the engine room. That redesign was where the value was created, not the motor itself.

We think about AI through the same lens. Most early corporate AI adoption is a motor swap: existing workflows, existing structures, existing assumptions, with AI bolted on. The companies that compound the most value are those willing to redesign the floor. This is a question I ask of every management team I invest behind. QXO is doing exactly that. As it consolidates the prosaic, low-tech business of building-products distribution, it is rebuilding the operating model itself, from pricing and procurement to inventory and branch data, rather than bolting technology onto the old way of working.

We apply the same standard to ourselves. We have wired over two decades of internal research into AI, making the firm's accumulated knowledge searchable for every analyst. It's valuable, but a motor swap. The deeper ambition is improving our decision-making. We are turning years of analyst decisions and investment reasoning into a dataset we can learn from, identifying where our research engine adds the most value and where our reasoning has led us astray. The goal is not to replace our stockpickers' judgement. It is to raise the ceiling on what they can do. We are in the early stages. We are adapting how we work, not our principles. In time, we believe it can make us better stewards of your capital.

Our founder, Allan W B Gray, had a phrase many of us still live by: "Strong convictions, loosely held." It means conviction grounded in evidence over emotion, and adapting your view when the facts change.

The owners who won the electrical age were not those who believed most strongly in electricity, but those who held their old assumptions loosely enough to rebuild around a new reality. The same holds true today. Geopolitical realignment, shifting trade and generational technology are all in motion at once. And we do not pretend to know how they resolve. The job is not to predict. It is to build a portfolio that benefits more from being right than it suffers from being wrong.

I am encouraged by our performance this year. But it is too early to celebrate. The environment will keep testing us. What I cannot know is what markets will do; they rarely co-operate with forecasts. What I do know: Our own money is invested alongside yours.

We will continue to act with discipline, independence and patience. Strong convictions, loosely held.

In the last quarter, we initiated a position in Booking Holdings, a US-based online travel and accommodation booking company, and reduced our positions in SK Square and Samsung Electronics into relative share price strength.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

Feeder fund

A feeder fund is a unit trust that invests in another single unit trust, which charges its own fees. Allan Gray does not charge any additional fees in its feeder funds.

Foreign securities

The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.
