

**Fund description and summary of investment policy**

The Fund is managed in broadly the same way as the Allan Gray Balanced Fund. It was created specifically for use in tax-free accounts and can only be accessed through these products. The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund can invest a maximum of 45% offshore. The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 75% and we may use exchange-traded derivative contracts on stock market indices to reduce net equity exposure from time to time. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund.

**ASISA unit trust category:** South African – Multi Asset – High Equity

**Fund objective and benchmark**

The Fund aims to create long-term wealth for investors within the constraints governing retirement funds. It aims to outperform the average return of similar funds without assuming any more risk. The Fund's benchmark is the market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds).

**How we aim to achieve the Fund's objective**

We seek to buy shares at a discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares we may increase the Fund's weighting to alternative assets such as bonds, property, commodities and cash, or we may partially hedge the Fund's stock market exposure. By varying the Fund's exposure to these different asset classes over time, we seek to enhance the Fund's long-term returns and to manage its risk. The Fund's bond and money market investments are actively managed.

**Suitable for those investors who**

- Seek steady long-term capital growth
- Are comfortable with taking on some risk of market fluctuation and potential capital loss, but typically less than that of an equity fund
- Wish to invest in a tax-free investment account
- Typically have an investment horizon of at least three years

**Maximum investment amounts**

Maximum lump sum per investor account	R46 000
Lifetime maximum	R500 000
Maximum debit order*	R 3 833.33

\*Only available to investors with a South African bank account.

**Fund information on 30 June 2026**

Fund size	R5.7bn
Number of units	234 666 497
Price (net asset value per unit)	R21.29
Class	A

1. The market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds). Source: Morningstar, performance as calculated by Allan Gray as at 30 June 2026.
2. This data reflects the latest available headline CPI inflation numbers as at 31 May 2026 (source: Iress).
3. Maximum percentage decline over any period. The maximum drawdown occurred from 20 January 2020 to 23 March 2020 and maximum benchmark drawdown occurred from 20 January 2020 to 23 March 2020. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 March 2021 and the benchmark's occurred during the 12 months ended 31 March 2021. The Fund's lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark's occurred during the 12 months ended 31 March 2020. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

### Fund history

This Fund is managed in broadly the same way as the Allan Gray Balanced Fund. It was created specifically for use in tax-free accounts. Refer to the Allan Gray Balanced Fund factsheet for a history of the Allan Gray Balanced Fund since its inception on 1 October 1999.

### Meeting the Fund objective

The Fund aims to create long-term wealth for investors within the constraints governing retirement funds. It aims to outperform the average return of similar funds without assuming any more risk. The Fund experiences periods of underperformance in pursuit of this objective. Since inception and over the latest 10- and five-year periods, the Fund has outperformed its benchmark.

### Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	<b>31 Dec 2025</b>	<b>30 Jun 2026</b>
<b>Cents per unit</b>	<b>20.9421</b>	<b>17.9001</b>

### Annual management fee

A fixed fee of 1.25% p.a. excl. VAT.

Allan Gray charges this fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. Orbis charges fixed fees within the Orbis funds that the Fund invests in. Orbis pays a marketing and distribution fee to Allan Gray.

### Total expense ratio (TER) and transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

### Top 10 share holdings on 30 June 2026 (SA and Foreign) (updated quarterly)<sup>7</sup>

Company	% of portfolio
AB InBev	4.3
Naspers & Prosus	3.1
Glencore	2.8
British American Tobacco	2.5
Standard Bank	2.3
AngloGold Ashanti	2.3
Nedbank	1.9
Remgro	1.7
The Walt Disney Company	1.4
Woolworths	1.4
<b>Total (%)</b>	<b>23.8</b>

7. Underlying holdings of foreign funds are included on a look-through basis.

### Total expense ratio (TER) and transaction costs for periods ending 30 June 2026 (updated quarterly)

1- and 3-year TER and transaction costs breakdown	1yr %	3yr %
<b>Total expense ratio</b>	<b>1.50</b>	<b>1.49</b>
Fee for benchmark performance	1.32	1.31
Other costs excluding transaction costs	0.05	0.04
VAT	0.14	0.14
<b>Transaction costs (including VAT)</b>	<b>0.09</b>	<b>0.07</b>
<b>Total investment charge</b>	<b>1.59</b>	<b>1.57</b>

### Asset allocation on 30 June 2026<sup>7</sup>

Asset class	Total	South Africa	Foreign
Net equities	66.4	38.2	28.2
Hedged equities	7.9	1.9	6.0
Property	0.9	0.1	0.9
Commodity-linked	2.1	1.8	0.3
Bonds	16.5	11.3	5.3
Money market and cash <sup>8</sup>	6.1	4.3	1.8
<b>Total (%)</b>	<b>100.0</b>	<b>57.5</b>	<b>42.5<sup>9</sup></b>

8. Includes the impact of any currency hedging.

9. The Fund can invest a maximum of 45% offshore. Market movements may periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Note: There may be slight discrepancies in the totals due to rounding.

### Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	57.5% (February 2016)
Average	64.4%
Maximum	72.5% (May 2021)

The Fund has returned 4.6% year to date, outperforming its benchmark by 3.9%. On a long-term basis, the absolute level of recent real returns is above what we would expect to deliver through the cycle. Long may it last.

Locally, the FTSE/JSE All Share Index (ALSI) is down 14% from its late February peak, amid a seemingly never-ending stream of geopolitical headlines that have manifested in increased price volatility, particularly among gold and platinum shares. What may be noteworthy for tenured investors is how precious metal shares have recently behaved more like risk-on assets. This runs counter to the notion that gold serves as a hedge against geopolitical risk. Gold Fields, which was the largest-weighted share in the ALSI during the first quarter of the year, has since fallen 41% from its peak in late January. As we have previously highlighted, the elevated weighting of precious metal shares in the ALSI is likely to introduce greater volatility and detract from the quality of the index's underlying fundamentals. At the end of the second quarter, the Fund's exposure to precious metals through miners and commodity exchange-traded funds was 7%.

As we reduced our positions in precious metals and British American Tobacco over the past year, we used the opportunity to initiate or add to positions that, in our view, improve the quality of the Fund. These include companies we have been materially underweight for some time, such as luxury goods group Richemont and food retailer Shoprite. Given their strong business fundamentals, it may be hard to believe that both shares have underperformed the broader market until recently. Richemont is the world's second-largest luxury goods company after LVMH, which we also hold in the Fund. Richemont owns some of the best jewellery brands in the world, including Cartier and Van Cleef & Arpels, with its less-profitable watch division contributing a declining share of group profits. Richemont has a very strong balance sheet with net cash before lease liabilities of approximately €8.5bn. We also like the fact that it's difficult to see artificial intelligence (AI) disrupting the luxury goods market, and that the company may even benefit from wealth created by the technology. There has also been a shift in the company's geographical revenue mix, away from Greater China to the United States.

The Fund has indirectly benefited from the rapid commercialisation of AI and the associated increase in spending. The stunning levels of capital expenditure announced by hyperscalers, such as Amazon and Alphabet, have led to a shortage of memory components used in AI data centre compute, particularly dynamic random-access memory (DRAM) and high bandwidth memory (HBM). This has resulted in a material increase in the earnings and share prices of businesses in the memory ecosystem, such as SK Square (through its stake in SK Hynix), Samsung Electronics and Micron Technology. Indeed, the three companies now have market capitalisations of over US\$1tn. The market will be closely monitoring the sustainability of their earnings. Our long-held position in Taiwan Semiconductor Manufacturing Company, whose dominant position in the foundry industry that produces high-end chips has continued to deliver stellar results, does not appear expensive relative to some other areas of the market.

During the quarter, the Fund added to its existing position in FirstRand, initiated a new position in Harmony Gold and reduced its holdings in AB InBev and Glencore.

## Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

## Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

## Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

## Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on [www.allangray.co.za](http://www.allangray.co.za).

## Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

## Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

## Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities

transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

## Information for investors in the tax-free investment account

The Allan Gray Tax-Free Investment Account is administered by Allan Gray Investment Services (Pty) Ltd, an authorised administrative financial services provider, and underwritten by Allan Gray Life Ltd, an insurer licensed to conduct investment-linked life insurance business as defined in the Insurance Act 18 of 2017. The underlying investment options of the Allan Gray individual products are portfolios of collective investment schemes in securities (unit trusts or funds).

## Foreign securities

The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.
