

**Fund description and summary of investment policy**

The Fund invests in shares listed on the Johannesburg Stock Exchange (JSE). The Fund is typically fully invested in shares. Returns are likely to be volatile, especially over short- and medium-term periods.

**ASISA unit trust category:** South African – Equity – SA General

**Fund objective and benchmark**

The Fund aims to create long-term wealth for investors. It aims to outperform the South African equity market over the long term, without taking on greater risk. To pursue its objective the Fund’s portfolio may differ materially from its benchmark. This will result in the Fund underperforming its benchmark materially at times. The Fund aims to compensate for these periods of underperformance by delivering outperformance over the long term. The Fund’s benchmark is the FTSE/JSE All Share Index including income.

**How we aim to achieve the Fund’s objective**

We seek to buy shares offering the best relative value while maintaining a diversified portfolio. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. We invest in a selection of shares across all sectors of the JSE, and across the range of large, mid and smaller cap shares.

**Suitable for those investors who**

- Seek exposure to JSE-listed equities to provide long-term capital growth
- Are comfortable with stock market fluctuation, i.e. short- to medium-term volatility
- Are prepared to accept the risk of capital loss
- Typically have an investment horizon of more than five years
- Wish to use the Fund as an equity ‘building block’ in a diversified multi asset class portfolio

**Meeting the Fund objective**

The Fund aims to outperform the South African equity market over the long term, without taking on greater risk. Since inception and over the latest 10- and five-year periods, the Fund has underperformed its benchmark.

**Fund information on 30 June 2026**

Value of R10 invested at inception with all distributions reinvested

1. FTSE/JSE All Share Index including income (source: Iress), performance as calculated by Allan Gray as at 30 June 2026.
2. This data reflects the latest available headline CPI inflation numbers as at 31 May 2026 (source: Iress).
3. Maximum percentage decline over any period. The maximum drawdown for the Fund occurred from 25 January 2018 to 23 March 2020 and maximum benchmark drawdown occurred from 17 January 2020 to 19 March 2020. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund’s monthly return. This is a measure of how much an investment’s return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception of the Fund. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund’s highest annual return occurred during the 12 months ended 31 March 2021 and the benchmark’s occurred during the 12 months ended 28 February 2026. The Fund’s lowest annual return occurred during the 12 months ended 31 March 2020 and the benchmark’s occurred during the 12 months ended 31 March 2020. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

### Fund history

The Allan Gray Equity Fund was managed in exactly the same way as this Fund from the inception of the Allan Gray Equity Fund on 1 October 1998, until March 2015, when the Allan Gray Equity Fund changed its mandate to include the ability to invest offshore. A combined history of the two funds since inception of the Allan Gray Equity Fund is available on the [Allan Gray website](#).

### Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	31 Dec 2025	30 Jun 2026
<b>Cents per unit</b>	<b>1197.7599</b>	<b>692.0407</b>

### Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund. The fee rate is calculated daily by comparing the Fund's total performance for the day to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each annualised percentage point above or below the benchmark we add or deduct 0.20%. The maximum fee is uncapped and if the fee would have been negative, 0.00% will be charged for the day and the negative fee will be carried forward to reduce the next day's fee (and all subsequent days until the underperformance is recovered).

This means that Allan Gray shares in 20% of annualised performance relative to the benchmark.

### Total expense ratio (TER) and transaction costs

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Note: There may be slight discrepancies in the totals due to rounding.

The Fund returned -1.7% for the quarter, slightly ahead of the benchmark's -2.4%. Year to date, performance has improved, with the Fund returning 2.6% compared to the benchmark's -3.0%. While the recent improvement in relative returns is pleasing, we continue to focus on long-term returns rather than near-term market movements.

Throughout the Fund's history, outperformance has tended to be stronger in falling markets than in rising markets. The recent performance has been in line with this pattern. 2025 was a more challenging period for the Fund: Absolute returns were good at 30.1% but lagged the benchmark's 42.4% return. The first half of 2026 has proven more challenging for markets overall. However, the Fund has meaningfully outperformed in this environment. The period also included significant volatility linked to the escalation of the US-Israeli conflict with Iran, reminding investors of the unpredictability of geopolitical events. This reinforces the importance of maintaining a diversified portfolio. We aim to position the Fund such that it can perform reasonably well across a range of macroeconomic environments rather than relying on a single outcome.

The strength of the FTSE/JSE All Share Index (ALSI) through 2025 and early 2026 was narrow and driven largely by resource shares, particularly a small group of precious metal producers. A key feature of the Fund's positioning has been an underweight to this segment. While we maintained a meaningful absolute allocation to gold, it remained well below the index weight, which we viewed as excessively large. Although we recognise gold's role as a portfolio hedge, we have limited exposure given concerns about single-commodity dependence and the sector's long history of value destruction. These risks became more evident during the period, with the gold price correcting after a strong run and company-specific issues emerging, such as Gold Fields' licence dispute in Ghana. Speculative activity in platinum group metals (PGMs) was pronounced in late 2025 and early 2026, with prices rising sharply. We used this strength to reduce exposure, maintaining only a small position. Since then, many PGM shares have corrected significantly, with some falling by more than half from their first-quarter peaks.

A second key theme has been the Fund's continued rotation into SA Inc. shares. Many domestically focused companies have lagged the broader market and still trade at depressed valuations despite the ALSI reaching record highs earlier this year. We took profits in areas of strength, such as precious metals and multinationals like British American Tobacco, and redeployed capital into select domestic businesses where valuations are more compelling. These include retailers such as Shoprite, Mr Price and Dis-Chem, which we view as high-quality businesses trading at meaningful discounts to their history. While the local macroeconomic backdrop remains extremely challenging, we continue to approach these opportunities with selectivity and caution.

During the quarter, the Fund added to select SA Inc. positions, including Bidvest and FirstRand, while reducing exposure to AngloGold Ashanti, Glencore and British American Tobacco.

### Information and content

The information in and content of this publication are provided by Allan Gray as general information about the company and its products and services. Allan Gray does not guarantee the suitability or potential value of any information or particular investment source. The information provided is not intended to, nor does it constitute financial, tax, legal, investment or other advice. Before making any decision or taking any action regarding your finances, you should consult a qualified financial adviser. Nothing contained in this publication constitutes a solicitation, recommendation, endorsement or offer by Allan Gray; it is merely an invitation to do business. Allan Gray has taken and will continue to take care that all information provided, in so far as this is under its control, is true and correct. However, Allan Gray shall not be responsible for and therefore disclaims any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable, directly or indirectly, to the use of or reliance on any information provided. Allan Gray is an authorised financial services provider.

### Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

### Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

### Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

### Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

### Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

### Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

## Important information for investors

### Need more information?

You can obtain additional information about your proposed investment from Allan Gray free of charge either via our website [www.allangray.co.za](http://www.allangray.co.za) or via our Client Service Centre on **0860 000 654**

### Fund description and summary of investment policy

The Fund invests mainly in selected shares and it uses exchange-traded derivative contracts on stock market indices to substantially reduce its net equity exposure to within a range of 0-20%. As a result, the Fund's return depends on the level of short-term interest rates (implicit in the pricing of the sold futures contracts) and the performance of the Fund's selected shares relative to the stock market index. The Fund's return is therefore unlikely to be correlated with equity market returns. In addition, a portion of the Fund is typically invested in cash and margin deposits.

ASISA unit trust category: South African – Multi Asset – Low Equity

### Fund objective and benchmark

The Fund aims to provide investors with long-term positive returns higher than those available in the money market sector, irrespective of stock market returns. The Fund's benchmark is the daily interest rate as supplied by FirstRand Bank Limited.

### How we aim to achieve the Fund's objective

The Fund invests in selected shares and seeks to substantially reduce stock market risk by selling exchange-traded equity index derivatives. The selected share portfolio is derived from our thorough research process, but the selection of equities in this Fund may differ from that in the other Allan Gray funds. The deviation of the Fund's selected share portfolio from the composition of the underlying benchmark indices (on which the derivative contracts are based) is restricted and closely monitored. This does not eliminate the risk of capital loss should the selected equities underperform.

### Suitable for those investors who

- Seek absolute (i.e. positive) returns regardless of stock market trends
- Require a high degree of capital stability over a 3-year time horizon
- Wish to invest in a product that offers uncorrelated returns relative to shares or bonds as a 'building block' in a diversified multi-asset class portfolio

### Meeting the Fund objective

Since inception and over the latest five-year period, the Fund has outperformed its benchmark. Over the latest 10-year period, the Fund has underperformed its benchmark. The Fund aims to deliver long-term positive returns, irrespective of stock market returns.

<b>Cents per unit</b>	<b>37.0558</b>	<b>33.1604</b>

**Annual management fee**

The fee rate is calculated daily by comparing the Fund’s total performance to that of the benchmark.

Fee for performance equal to the Fund’s benchmark: 1.00% p.a. excl. VAT

The Fund is first required to recover any underperformance before a fee higher than the fee for performance equal to the benchmark can be charged. This is known as a high watermark. If the Fund’s performance is above its previous high watermark, we add 0.20% to the fee for each percentage of performance above the high watermark. The fee is uncapped.

**Total expense ratio (TER) and transaction costs**

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Hedged equities	75.8
Money market and cash	16.6
<b>Total (%)</b>	<b>100.0</b>

**Since inception, the Fund’s month-end net equity exposure has varied as follows:**

Minimum	-3.6% (September 2016) <sup>7</sup>
Average	4.5%
Maximum	15.4% (November 2018)

7. The negative net equity exposure as at 30 September 2016 is due to the cash acquisition of SABMiller by Anheuser-Busch InBev. This was corrected and the Fund had a positive net equity exposure by 4 October 2016.

Note: There may be slight discrepancies in the totals due to rounding.

While 2025 delivered stellar market returns, the first half of the year has presented an altogether more difficult environment for investors, with the outbreak of war in the Middle East in February being the single biggest market-moving event. The escalation of the conflict and the resulting shipping disruptions in the Strait of Hormuz, through which roughly one-fifth of the global oil supply is transported, led to a sharp rise in crude oil prices. In turn, rising inflation expectations and lower economic growth estimates have heightened global market volatility.

Heading into the year, the consensus was that the interest rate-cutting cycle would continue, but the war has reversed this narrative and pushed the European Central Bank, the Bank of Japan and the South African Reserve Bank towards hikes. Developed market sovereign debt yields have broadly moved higher. In the United States, expectations that the incoming US Federal Reserve (Fed) chair, Kevin Warsh, would favour policy easing were also challenged, as the Fed's recent statement took a more hawkish tone. Greater emphasis was placed on reining in rising prices as US inflation hit levels last seen in 2023, when the Fed was tightening monetary policy. Market expectations shifted dramatically towards two rate hikes by the end of the year.

The signing of a memorandum of understanding between the United States and Iran in June and subsequent attempts to restore normal transit through the Strait of Hormuz have contributed to a significant decline in oil prices, fully reversing the war-driven increase. However, tensions remain elevated, with uncertainty on how long the ceasefire will endure. Although each side is motivated by different incentives, it is becoming clearer that the bar for resuming hostilities has moved higher.

Against this backdrop, the FTSE/JSE All Share Index returned -3.0% year to date and -2.4% for the quarter. The underlying sectors saw a large divergence in returns during the quarter, with Resources returning -18.7% compared to 4.8% for Industrials and 8.0% for Financials. In previous commentaries, we have highlighted the increasingly concentrated nature of the local index, particularly the significant weight assigned to precious metal miners. The 14% decline in the gold price during the quarter, on account of a hawkish shift in Fed expectations and a stronger dollar, weighed heavily on gold and platinum group metal (PGM) miners.

The Fund has returned 9.1% year to date, aided by its underweight exposure to precious metal miners and Naspers/Prosus. Overweight holdings in Sasol, Aspen Pharmacare and Premier were also notable contributors.

During the quarter, the Fund bought a basket of PGM miners after share prices fell by over 50% from their first-quarter peaks. The purchases were funded by trimming exposure to Aspen Pharmacare, Sasol and Glencore.

The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

### Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

### Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

### Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

### Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

### Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

### FTSE/JSE indices

The FTSE/JSE indices referenced herein are calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. **Fund description and summary of investment policy**

The Fund invests in South African interest-bearing securities. Securities include national government, parastatal, municipal and corporate bonds, as well as money market instruments. The Fund price is sensitive to interest rate movements because of the long-term nature of the Fund's investments. The duration of the Fund may differ materially from the benchmark. The Fund is managed to comply with investment limits governing retirement funds.

ASISA unit trust category: South African – Interest Bearing – Variable Term

**Fund objective and benchmark**

The Bond Fund's goal is to deliver returns that exceed inflation and cash over the long term, without taking on undue risk. The Fund's benchmark is the FTSE/JSE All Bond Index.

**How we aim to achieve the Fund's objective**

We try to balance credit risk, duration risk and liquidity risk when selecting investments. We target total returns for investors rather than trying to mirror the returns of the FTSE/JSE All Bond Index. When we cannot find value in the bond markets, our portfolio will be weighted towards cash to achieve better returns.

**Suitable for those investors who**

- Seek a bond 'building block' for a diversified multi-asset class portfolio
- Are looking for returns in excess of those provided by money market or cash investments
- Are prepared to accept more risk of capital depreciation than in a money market or cash investment

**Meeting the Fund objective**

Since inception the Fund has outperformed its benchmark. Over the latest 10- and five-year periods, the Fund has underperformed its benchmark. The Fund has provided returns in excess of CPI inflation for all three periods. The Fund aims to take no greater risk than its benchmark. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

**Fund information on 30 June 2026**

Fund size	R11.3bn
Number of units	614 428 603
Price (net asset value per unit)	R12.18
Modified duration	5.6
Gross yield (i.e. before fees)	8.6
Class	A

**Performance net of all fees and expenses**

Value of R10 invested at inception with all distributions reinvested

1. FTSE/JSE All Bond Index (source: Iress), performance as calculated by Allan Gray as at 30 June 2026.
2. This data reflects the latest available headline CPI inflation numbers as at 31 May 2026 (source: Iress).
3. Maximum percentage decline over any period. The maximum drawdown occurred from 27 February 2020 to 24 March 2020 and maximum benchmark drawdown occurred from 26 February 2020 to 23 March 2020. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 28 February 2026 and the benchmark's occurred during the 12 months ended 31 January 2016 and the benchmark's occurred during the 12 months ended 31 January 2016. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Maturity profile on 30 June 2026

Note: There may be slight discrepancies in the totals due to rounding.

After a tumultuous start to 2026, South African government bond yields are mostly flat relative to the start of the year, and the FTSE/JSE All Bond Index year-to-date return is back in positive total return territory. While the prospect of a US-Iran peace deal and the reopening of the Strait of Hormuz set the stage for South African bonds to rally back to where they started the year, it has been a markedly more difficult year for developed market bonds, such as US Treasuries, UK Gilts, German Bunds and French OATs. Historically, such a sell-off in developed market bonds has impacted South African and African debt returns. Between 2013 and 2023, yield changes in African sovereign bonds tended to move with US Treasuries. When US Treasuries sold off, African bonds (including those of South Africa) also lost value.

If one plots the yield movements of African sovereign bonds against those of US Treasuries between 2023 and 2026, one observes African debt yields falling precisely when US government bond yields are rising. Developed market bonds are trading near their yield highs, or price lows, last seen 10 to 20 years ago. While inflation is partly to blame, bearing in mind that the United States has not been able to achieve its 2% inflation target in more than five years, another factor at play is that many developed market sovereigns are running some of the widest fiscal deficits on record outside of crisis periods, such as the COVID-19 pandemic, global financial crisis and global wartime periods. On a primary balance basis, many African sovereigns are in primary surplus, and several are running smaller fiscal deficits than the United States, France and the United Kingdom.

South Africa has run a cumulative primary surplus of approximately R270bn since the 2022/2023 financial year, ending the trend of primary deficits that previously ran for more than a decade. While this is incredibly positive on paper, what is often overlooked is that roughly R180bn of these surpluses came from monetising the Gold and Foreign Exchange Contingency Reserve Account (GFECRA). Revenue overruns have also been achieved due to high commodity and platinum group metal prices. That said, it is important to acknowledge that fiscal prudence has channelled these windfalls towards reducing the rate of government borrowing from the prior dramatic pace of increase envisaged in the 2023 Medium-Term Budget Policy Statement prior to the GFECRA monetisation decision.

From a pace of R4bn per week in 2023, fixed-rate government bond auctions have been slashed to R2.5bn per week, although we must not forget the important role that innovations like the floating-rate bond and sukuk issuances have played in facilitating this reduction. At the current pace of fixed-rate bond issuance, roughly 70% of coupons need to be reinvested to fund the local fixed-rate borrowing requirement. By contrast, prior to 2023, local investors effectively had to reinvest all their coupons and commit extra capital to fund the primary deficit and make up for foreign investors' capital withdrawals, as these non-residents did not fully reinvest coupons. In short, weekly auctions are much easier to fund today, as evidenced by the fact that they are sometimes as high as five to six times oversubscribed.

Against such a backdrop, it can be tough to make a strong bear case for South African bonds on the basis of supply and demand. The success or failure of the 3% inflation target is one factor that may throw a spanner in the works with regard to appropriate fair value, with a potential El Niño shock or a further rise in administered prices representing two of the near-term risks beyond oil-related secondary shocks. Political upheaval in the run-up to the local government elections and the next national elections may also alter perceptions of risk premia.

In the last quarter, the Fund continued to switch out of the 20-year area of the bond curve and into the 12-year area of the curve. At the extreme end of the South African bond yield curve, an investor earns a meagre 20 basis points of yield pick-up to take on 15 years of additional time-to-maturity, or 3 points worth of modified duration. This level of curve flatness arguably offers an imprudent risk-reward ratio, especially given the strong capital gains of the last year.

Allan Gray is an authorised financial services provider.

### Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

### Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

### Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

### Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

### Yield

The Allan Gray Bond Fund's gross yield is the estimated weighted average yield-to-maturity of all underlying interest-bearing instruments as at the last day of the month. Actual returns may differ, based on changes in market values, interest rates and market factors during the investment period.

### Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

### Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

### Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

## Important information for investors

### Need more information?

You can obtain additional information about your proposed investment from Allan Gray free of charge either via our website [www.allangray.co.za](http://www.allangray.co.za) or via our Client Service Centre on **0860 000 654**

### Fund description and summary of investment policy

The Fund invests primarily in a mix of South African interest-bearing securities, with limited exposure to offshore interest-bearing securities. Returns are likely to be less volatile than those of a bond-only fund. The Fund is managed to comply with the investment limits governing retirement funds.

ASISA unit trust category: South African – Multi Asset – Income

### Fund objective and benchmark

The Fund aims to generate income and produce returns that are superior to traditional money market funds, while preserving capital and minimising the risk of loss over any one- to two-year period. The Fund's benchmark is the Alexforbes Short Term Fixed Interest (STeFI) Composite Index.

### How we aim to achieve the Fund's objective

The Fund invests in a broad range of South African interest-bearing securities, such as floating-rate notes, inflation-linked bonds, fixed-rate instruments and money market securities, with limited exposure to offshore interest-bearing securities. It provides investors with income and a high degree of capital stability. We formulate an interest rate outlook, which is influenced by our inflation outlook and expectations of the resulting Reserve Bank policy response. Based on this analysis, we select securities for the Fund. While the Fund can have limited exposure to equities and property, we expect this to occur infrequently and to typically coincide with unusual or extreme points in the valuation cycle. We take a conservative approach to managing the Fund, balancing credit risk, duration risk and liquidity risk when selecting securities.

### Suitable for those investors who

- Are risk-averse and require capital preservation over any one- to two-year period
- Seek returns higher than traditional money market funds
- Seek a unit trust that provides an income
- Seek a prudently managed income 'building block'
- Wish to invest in a unit trust that complies with retirement fund investment limits

### Meeting the Fund objective

Since inception the Fund has outperformed its benchmark and provided returns in excess of CPI inflation. The Fund aims to minimise risk of loss over any one- to two-year period.

### Income distributions for the last 12 months

Actual payout, the Fund distributes quarterly	30 Sep 2025	31 Dec 2025	31 Mar 2026	30 Jun 2026

9. Foreign exposure on 30 June 2026: 4.4% is invested in foreign investments.

**Maturity profile on 30 June 2026**

Note: There may be slight discrepancies in the totals due to rounding.

The first half of the year has presented a more difficult environment for investors, with the outbreak of war in the Middle East in February being the single biggest market-moving event. The escalation of the conflict and the resulting shipping disruptions in the Strait of Hormuz, through which roughly one-fifth of the global oil supply is transported, led to a sharp rise in crude oil prices. In turn, rising inflation expectations and lower economic growth estimates have heightened global market volatility.

Heading into the year, the consensus was that the interest rate-cutting cycle would continue, but the war has reversed this narrative and pushed the European Central Bank and the Bank of Japan towards hikes. Other banks moved to hold rates steady owing to the uncertainty. Developed market sovereign debt yields broadly moved higher. In the United States, expectations that the incoming US Federal Reserve (Fed) chair, Kevin Warsh, would favour policy easing were also challenged, as the Fed's recent statement took a more hawkish tone. Greater emphasis was placed on reining in rising prices as US inflation hit levels last seen in 2023, when the Fed was tightening monetary policy. Market expectations shifted dramatically towards two rate hikes by the end of the year.

The South African Reserve Bank (SARB) raised the key repo rate by 25 basis points (bps) to 7% at its Monetary Policy Committee (MPC) meeting in May. This marked the SARB's first interest rate hike since 2023, following two consecutive holds. The vote was split four to two, with four members favouring the hike and two preferring no change. A larger 50 bps hike was considered, but the MPC ultimately decided that second-round effects, where the shock broadens into wages and inflation expectations, were not yet sufficiently evident in the data to justify a larger increase.

The South African consumer price index (CPI) rose from the low 3% range seen earlier in the year to 4.5% in May, largely due to higher energy costs. Fuel prices increased 28.7% year-on-year, marking one of the largest jumps in fuel inflation on record. Excluding fuel, the CPI was 3.7% in May, unchanged from April, and has remained within a narrow 3.5-3.8% range over the past 12 months, with monthly ex-fuel inflation at just 0.2% in May. This shows that the fuel shock is responsible for most of the increase in the headline number, while broader underlying inflation is only rising slowly.

The signing of a memorandum of understanding between the United States and Iran in June and subsequent attempts to restore normal transit through the Strait of Hormuz have contributed to a significant decline in the oil price, fully reversing the war-driven increases. Despite ongoing tensions and a fragile ceasefire, the recent drop in oil prices has mitigated the immediate inflation risks in South Africa's near-term outlook that had warranted the rate hike in May. As a result, expectations for further rate increases have moderated from the elevated levels seen during the conflict.

During the quarter, the Fund increased its allocation to floating-rate paper and inflation-linked bonds. In light of the upside inflation risks, the Fund stands to benefit from this positioning, as these instruments would benefit from higher inflation and interest rates. At quarter end, the Fund's annualised gross yield was 8.5%.

### Information and content

The information in and content of this publication are provided by Allan Gray as general information about the company and its products and services. Allan Gray does not guarantee the suitability or potential value of any information or particular investment source. The information provided is not intended to, nor does it constitute financial, tax, legal, investment or other advice. Before making any decision or taking any action regarding your finances, you should consult a qualified financial adviser. Nothing contained in this publication constitutes a solicitation, recommendation, endorsement or offer by Allan Gray; it is merely an invitation to do business. Allan Gray has taken and will continue to take care that all information provided, in so far as this is under its control, is true and correct. However, Allan Gray shall not be responsible for and therefore disclaims any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable, directly or indirectly, to the use of or reliance on any information provided. Allan Gray is an authorised financial services provider.

### Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or [www.rmb.co.za](http://www.rmb.co.za).

### Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

### Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

### Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on [www.allangray.co.za](http://www.allangray.co.za).

### Yield

The Fund's gross yield is the estimated weighted average yield-to-maturity of all underlying interest-bearing instruments as at the last day of the month. The one-year TER is deducted from the gross yield to derive a yield net of fund expenses. Actual returns may differ based on changes in market values, interest rates and market factors during the investment period.

### Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

### Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

### Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

### Foreign securities

The Fund may invest in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

### FTSE/JSE indices

The FTSE/JSE indices referenced herein are calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Limited ("JSE") in accordance with standard criteria. The FTSE/JSE indices are the proprietary information of FTSE and the JSE. All copyright subsisting in the FTSE/JSE indices' values and constituent lists vests in FTSE and the JSE jointly. All their rights are reserved.

### Bloomberg Index Services Limited

Bloomberg® and the indices referenced herein (the "Indices", and each such index, an "Index") are service marks of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg") and/or one or more third-party providers (each such provider, a "Third-Party Provider;") and have been licensed for use for certain purposes to Allan Gray Proprietary Limited (the "Licensee"). To the extent a Third-Party Provider contributes intellectual property in connection with the Index, such third-party products, company names and logos are trademarks or service marks, and remain the property, of such Third-Party Provider. Bloomberg or Bloomberg's licensors own all proprietary rights in the Bloomberg Indices. Neither Bloomberg nor Bloomberg's licensors, including a Third-Party Provider, approves or endorses this material, or guarantees the accuracy or completeness of any information herein, or makes any warranty, express or implied, as to the results to be obtained therefrom and, to the maximum extent allowed by law, neither Bloomberg nor Bloomberg's licensors, including a Third-Party Provider, shall have any liability or responsibility for injury or damages arising in connection therewith.

## Important information for investors

### Need more information?

You can obtain additional information about your proposed investment from Allan Gray free of charge either via our website [www.allangray.co.za](http://www.allangray.co.za) or via our Client Service Centre on **0860 000 654**.

### Fund description and summary of investment policy

The Fund invests in South African money market instruments with a term shorter than 13 months. These instruments can be issued by government, parastatals, corporates and banks. The Fund is managed to comply with regulations governing retirement funds.

While capital losses are unlikely, they can occur if, for example, one of the issuers of an instrument held by the Fund defaults. In this event losses will be borne by the Fund and its investors.

ASISA unit trust category: South African – Interest Bearing – SA Money Market

### Fund objective and benchmark

The Fund aims to preserve capital, maintain liquidity and generate a sound level of income. The Fund's benchmark is the Alexforbes Short Term Fixed Interest (STeFI) 3-month Index.

### How we aim to achieve the Fund's objective

The Fund invests in selected money market instruments providing an income yield and a high degree of capital stability. We formulate an interest rate outlook, which is influenced by our inflation outlook and expectations of the resulting Reserve Bank policy response. Based on this analysis, we select investments for the Fund. These assets are typically held to maturity. We take a conservative approach to credit risk.

### Suitable for those investors who

- Require monthly income distributions
- Are highly risk-averse but seek returns higher than bank deposits
- Need a short-term investment account

### Meeting the Fund objective

The Fund has preserved capital, maintained liquidity and generated a sound level of income.

### Fund information on 30 June 2026

Fund size	R28.1bn
Number of units	24 659 571 691
Price (net asset value per unit)	R1.00
Monthly yield at month end	0.57
Fund weighted average duration (days)	83.52
Fund weighted average maturity (days)	114.60
Class	A

- The current benchmark is the Alexforbes Short Term Fixed Interest (STeFI) 3-month Index. From inception to 31 March 2003, the benchmark was the Alexforbes 3-Month Deposit Index. From 1 April 2003 to 31 October 2011, the benchmark was the Domestic Fixed Interest Money Market Collective Investment Scheme sector excluding the Allan Gray Money Market Fund. From 1 November 2011 to 19 August 2024, the benchmark was the Alexforbes Short Term Fixed Interest (STeFI) Composite Index. Performance as calculated by Allan Gray as at 30 June 2026. Source: Bloomberg.
- This data reflects the latest available headline CPI inflation numbers as at 31 May 2026 (source: Iress).
- The percentage of calendar months in which the Fund produced a positive monthly return since inception.
- The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
- These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 31 July 2003 and the benchmark's occurred during the 12 months ended 31 July 2003. The Fund's lowest annual return occurred during the 12 months ended 31 October 2021 and the benchmark's occurred during the 12 months ended 31 October 2021. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

### Income distributions for the last 12 months

Actual payout (cents per unit), the Fund distributes monthly

### Annual management fee

A fixed fee of 0.25% p.a. excl. VAT

### Total expense ratio (TER) and transaction costs

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

### Total expense ratio (TER) and transaction costs for periods ending 30 June 2026 (updated quarterly)

1- and 3-year TER and transaction costs breakdown	1yr %	3yr %
<b>Total expense ratio</b>	<b>0.29</b>	<b>0.29</b>
Fee for benchmark performance	0.25	0.25
Other costs excluding transaction costs	0.00	0.00
VAT	0.04	0.04
<b>Transaction costs (including VAT)</b>	<b>0.00</b>	<b>0.00</b>
<b>Total investment charge</b>	<b>0.29</b>	<b>0.29</b>

### Credit exposures as at 30 June 2026

Sanlam	1.5
<b>Total (%)</b>	<b>100.0</b>

### Asset allocation on 30 June 2026

Asset class	Total
Bonds	1.2
Money market and cash	98.8
<b>Total (%)</b>	<b>100.0</b>

6. Banks include negotiable certificates of deposit (NCDs), floating-rate notes, fixed-rate notes, and call deposits.

Note: There may be slight discrepancies in the totals due to rounding.

While 2026 began with the overnight rate at 6.75% and the 12-month bank funding rate at 7.1%, these yields have subsequently risen to 7.0% and 7.6%, respectively. The 50-basis-point move in the 12-month part of the curve suggests that, beyond the interest rate hike implemented by the South African Reserve Bank (SARB) at its Monetary Policy Committee meeting in May, the market expects at least one more rate hike this year, with forward rate agreements suggesting that two more hikes could be on the cards.

Much of the debate around how long a shadow the oil price shock will cast rests on how quickly global inventories will be refilled, with the US Strategic Petroleum Reserve now at its lowest inventory level since the early 1980s. Despite this, traded oil prices normalised to their pre-war levels after the latest US-Iran ceasefire agreement and the reopening of the Strait of Hormuz. With the United Arab Emirates formally exiting the Organization of the Petroleum Exporting Countries agreement in May and abandoning its oil production quota, there is a possibility that the oil market could move into surplus relatively quickly.

Risks to the inflation outlook have not fully abated, however. An anticipated weather-related shock may raise prices later in the year: Climatologists are currently predicting an elevated risk of a "super El Niño" cycle based on changing sea-surface temperature data, with the caveat that weather forecasting is not a so-called exact science. Historically, these cycles have raised agricultural prices, most notably for wheat, cocoa, palm oil and corn, due to Southern Hemisphere drought conditions and reduced rainfall across regions such as West Africa, India and South-East Asia.

Fortunately, South Africa is favourably positioned for such a risk event, having enjoyed back-to-back seasons of surplus grains and elevated crop yields, as well as the strongest water storage levels across national dams that we have experienced in many years. This, of course, does not fully insulate us from a shock to global food prices. We could become increasingly vulnerable to a sustained drought through 2027 that would deplete surplus crops. Additionally, the high percentage of water that is lost to leaks across several provinces already increases our susceptibility to water rationing. At its most recent meeting, the SARB modelled for headline inflation possibly climbing to 6% in an El Niño shock due to a double-digit rise in food prices. In turn, the SARB modelled for the potential to raise the overnight rate as high as 7.75% to 8% in response.

In the last quarter, the Fund increased its allocation to floating-rate paper. Such adverse scenarios, like the potential for an inflationary shock, are considered when managing the Fund, as reflected in a strong allocation to floating-rate paper whose yields are expected to rise with rate hikes.

### Information and content

The information in and content of this publication are provided by Allan Gray as general information about the company and its products and services. Allan Gray does not guarantee the suitability or potential value of any information or particular investment source. The information provided is not intended to, nor does it constitute financial, tax, legal, investment or other advice. Before making any decision or taking any action regarding your finances, you should consult a qualified financial adviser. Nothing contained in this publication constitutes a solicitation, recommendation, endorsement or offer by Allan Gray; it is merely an invitation to do business. Allan Gray has taken and will continue to take care that all information provided, in so far as this is under its control, is true and correct. However, Allan Gray shall not be responsible for and therefore disclaims any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable, directly or indirectly, to the use of or reliance on any information provided. Allan Gray is an authorised financial services provider.

### Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

### Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

### Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

### The Allan Gray Money Market Fund is not a bank deposit account

The Fund aims to maintain a constant price of 100 cents per unit. The total return an investor receives is made up of interest received and any gain or loss made on instruments held by the Fund. While capital losses are unlikely, they can occur if, for example, one of the issuers of an instrument defaults. In this event, investors may lose some of their capital. To maintain a constant price of 100 cents per unit, investors' unit holdings will be reduced to the extent of such losses. The yield is calculated according to applicable ASISA standards. Excessive withdrawals from the Fund may place it under liquidity pressure; if this happens, withdrawals may be ring-fenced and managed over a period of time.

Purchase and redemption requests must be received by the Management Company by 11:00 each business day to receive that day's price. Unit trust prices are available daily on [www.allangray.co.za](http://www.allangray.co.za).

### Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

### Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).

### Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act 24 of 1956 (the "Pension Funds Act"). Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within the prescribed regulatory time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

### Bloomberg Index Services Limited
