

Fund description and summary of investment policy

The Fund invests in a mix of shares, bonds, property, commodities and cash. The Fund can invest a maximum of 30% offshore, with an additional 10% allowed for investments in Africa outside of South Africa. The Fund typically invests the bulk of its foreign allowance in a mix of funds managed by Orbis Investment Management Limited, our offshore investment partner. The maximum net equity exposure of the Fund is 75% and we may use exchange-traded derivative contracts on stock market indices to reduce net equity exposure from time to time. The Fund is managed to comply with the investment limits governing retirement funds. Returns are likely to be less volatile than those of an equity-only fund.

ASISA unit trust category: South African – Multi Asset – High Equity

Fund objective and benchmark

The Fund aims to create long-term wealth for investors within the constraints governing retirement funds. It aims to outperform the average return of similar funds without assuming any more risk. The Fund's benchmark is the market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds).

How we aim to achieve the Fund's objective

We seek to buy shares at a discount to their intrinsic value. We thoroughly research companies to assess their intrinsic value from a long-term perspective. This long-term perspective enables us to buy shares which are shunned by the stock market because of their unexciting or poor short-term prospects, but which are relatively attractively priced if one looks to the long term. If the stock market offers few attractive shares we may increase the Fund's weighting to alternative assets such as bonds, property, commodities and cash, or we may partially hedge the Fund's stock market exposure. By varying the Fund's exposure to these different asset classes over time, we seek to enhance the Fund's long-term returns and to manage its risk. The Fund's bond and money market investments are actively managed.

Suitable for those investors who

- Seek steady long-term capital growth
- Are comfortable with taking on some risk of market fluctuation and potential capital loss, but typically less than that of an equity fund
- Wish to invest in a unit trust that complies with retirement fund investment limits
- Typically have an investment horizon of more than three years

Minimum investment amounts

Minimum lump sum per investor account	R20 000
Additional lump sum	R500
Minimum debit order*	R500

*Only available to investors with a South African bank account.

Fund information on 31 March 2018

Fund size	R142.1bn
Number of units	787 924 337
Price (net asset value per unit)	R104.21
Class	A

1. The market value-weighted average return of funds in the South African – Multi Asset – High Equity category (excluding Allan Gray funds). From inception to 31 January 2013 the benchmark was the market value-weighted average return of the funds in both the Domestic Asset Allocation Medium Equity and Domestic Asset Allocation Variable Equity sectors of the previous ASISA Fund Classification Standard, excluding the Allan Gray Balanced Fund. Source: Morningstar, performance as calculated by Allan Gray as at 31 March 2018.
2. This is based on the latest numbers published by IRESS as at 28 February 2018.
3. Maximum percentage decline over any period. The maximum drawdown occurred from 20 May 2008 to 27 October 2008 and maximum benchmark drawdown occurred from 20 May 2008 to 10 March 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund's highest annual return occurred during the 12 months ended 30 April 2006 and the benchmark's occurred during the 12 months ended 30 April 2006. The Fund's lowest annual return occurred during the 12 months ended 28 February 2009 and the benchmark's occurred during the 12 months ended 28 February 2009. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

Performance net of all fees and expenses

Highest annual return ⁶	46.1	41.9	n/a
Lowest annual return ⁶	-8.3	-16.7	n/a

Meeting the Fund objective

The Fund has created wealth for its long-term investors. Since inception and over the latest 10 and five-year periods, the Fund has outperformed its benchmark, and its returns have exceeded CPI inflation by a significant margin. The Fund experiences periods of underperformance in pursuit of its objective of creating long-term wealth for investors, without taking on greater risk of loss than the average balanced fund. The maximum drawdown and lowest annual return numbers, in the 'Performance net of all fees and expenses' table, show that the Fund has successfully reduced downside risk in periods of negative market returns.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	30 Jun 2017	31 Dec 2017
Cents per unit	99.1583	102.0649

Annual management fee

Allan Gray charges a fee based on the net asset value of the Fund excluding the portion invested in Orbis funds. The fee rate is calculated daily by comparing the Fund's total performance over the last two years, to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

For each percentage of two-year performance above or below the benchmark we add or deduct 0.1%, subject to the following limits:

Maximum fee: 1.50% p.a. excl. VAT

Minimum fee: 0.50% p.a. excl. VAT

This means that Allan Gray shares in approximately 20% of annualised performance relative to the benchmark.

A portion of the Fund may be invested in Orbis funds. Orbis charges performance-based fees within these funds that are calculated based on each Orbis fund's performance relative to its own benchmark. Orbis pays a marketing and distribution fee to Allan Gray.

Total expense ratio (TER) and Transaction costs

The annual management fees charged by both Allan Gray and Orbis are included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 31 March 2018 (SA and Foreign) (updated quarterly)⁸

Company	% of portfolio
Naspers ⁷	5.8

Total (%)	100.0	67.7	2.7	29.6⁹

8. Underlying holdings of Orbis funds are included on a look-through basis.

9. The Fund can invest a maximum of 30% offshore, with an additional 10% allowed for investments in Africa outside of South Africa. Market movements periodically cause the Fund to move beyond these limits. This must be corrected within 12 months.

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	(February 2000) 49.3%
Average	62.1%
Maximum	(July 2004) 72.7%

Note: There may be slight discrepancies in the totals due to rounding.

The first quarter proved to be a difficult one for absolute returns. The most significant detractors were the international investments and local equities. World markets fell 1% in dollars, the rand strengthened by 4% over the period and the FTSE/JSE All Share Index declined 6%. The positive contribution from fixed interest was insufficient to offset the equity declines.

The relatively modest market moves over the quarter belie the volatility many experienced during the period. Some investors were lulled into a false sense of security by the orderly uptrend of world markets from January 2016 to January 2018, a period over which the MSCI World Index rose 50%. The strong markets over the past two (in fact 10) years have made us increasingly nervous; we far prefer volatile and falling markets over calm and strongly rising ones. Don't get me wrong, we don't want our clients to lose money over any period, but the good thing about volatility and down markets is that they create opportunities for outsized returns. When markets fall value investors are able to buy companies that have been sold down to below their fair value - a very exciting prospect.

We are constantly searching for assets that will give our investors good real returns. The shares we bought in 2015 and 2016 performed pleasingly in 2017 and we were substantial net sellers of domestic equity in late 2017 and January 2018 as many domestically orientated companies reached and exceeded our estimate of their fair value. This was particularly true of the banks we bought during the very volatile Nene-gate period, when South Africa's future looked very grim and investors priced shares accordingly. At the time, investors over-reacted on the downside by becoming excessively cautious. We are concerned that after the great news of Cyril Ramaphosa replacing Jacob Zuma and the positive changes at Eskom and government generally, investors are over-reacting by becoming too positive on South African assets.

Investing is about comparing the price of an asset to its value. Value is subjective and inherently uncertain as it involves the future. Different investors use very different sets of assumptions to value assets. At the moment we think investors are using assumptions that may be overly positive and therefore they are overvaluing certain assets. If the future is not as rosy as these investors expect, the returns from the assets they value highly now will be disappointing. It is far better to invest in assets where expectations are very low, that way, when things turn out to be "not that bad" investors are surprised on the upside. We look for assets where expectations are low and our normal estimates exceed those priced in by the market.

The rand is trading at about fair value to the US dollar if one adjusts the historic rand/dollar exchange rate for both American and South African inflation. Looking at this data alone would indicate a neutral stance on the rand. We are a little more cautious than neutral for a few reasons. Despite very weak domestic demand, anaemic investment expenditure and favourable terms of trade at present, South Africa still has a current account deficit of 2.5% of GDP. The recent history of the rand (since 2002) has been somewhat distorted by the Chinese commodity boom, which has greatly assisted our exports.

We have used the opportunity provided by the current rand strength to increase the Fund's international investments by 5% to 29.4%, in addition to the 2.3% invested in African bonds and equities. Given the generally high market valuations we have invested the additional 5% in hedged equity, corporate bonds and money market assets. We funded the 5% by selling South African shares and bonds.

commentary as at
31 March 2018**

Management Company

Allan Gray Unit Trust Management (RF) Proprietary Limited (the 'Management Company') is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates 11 unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Services Board ('FSB'). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however it is not supervised or licensed in Botswana. Allan Gray Proprietary Limited (the 'Investment Manager'), an authorised financial services provider, is the appointed Investment Manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)87 736 1732 or www.rmb.co.za

Performance

Collective Investment Schemes in Securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. Movements in exchange rates may also cause the value of underlying international investments to go up or down. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Where annualised performance is mentioned, this refers to the average return per year over the period. Actual investor performance may differ as a result of the investment date, the date of reinvestment and dividend withholding tax.

Fund mandate

The Fund may be closed to new investments at any time in order to be managed according to its mandate. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za

Fees

Permissible deductions may include management fees, brokerage, Securities Transfer Tax (STT), auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray.

Total expense ratio (TER) and Transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, Securities Transfer Tax [STT], STRATE and FSB Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and Transaction costs is shown as the Total investment charge.

Compliance with Regulation 28

The Fund is managed to comply with Regulation 28 of the Pension Funds Act. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period. The Management Company does not monitor compliance by retirement funds with section 19(4) of the Pension Funds Act (item 6 of Table 1 to Regulation 28).

Foreign exposure

This fund may invest in foreign funds managed by Orbis Investment Management Limited, our offshore investment partner.
