Global Opportunities Equity seeks to give investors access to some of the best fund managers across the globe. Our intent is to outperform its benchmark over any five year period.

Global Opportunities Equity is a multi-manager fund which invests in a limited number of strategies (funds and segregated mandates) managed by top-quality managers that mainly have exposure to shares in developed markets. It is also mandated to include some exposure to emerging markets. Typically, six to ten strategies are included. Each strategy is selected based on its long-term track record of outperforming the market, its investment philosophy and the quality of its fund managers. The fund is mandated to use derivative instruments for efficient portfolio management purposes.

Global Opportunities Equity invests in equity funds that mostly cover developed markets, including the US, Europe and Japan. The fund is well-diversified; it has exposure to a range of different countries, industries and fund manager styles. The fund managers included in the fund are well-established and have been rigorously researched and vetted. While we have a disciplined approach to carefully balance the risks across the different funds, shares can be volatile investments and there is a meaningful risk of capital loss over the short term. Global currency movements may intensify investment gains or declines.

The fund is managed to deliver the best possible returns over the long term; an investment horizon of 10 years or more is therefore ideal. It is not suitable as a single investment for investors who need to preserve their capital over five years or less.

Investors who are building wealth, and who

- want exposure to some of the world’s top equity funds as part of a diversified investment portfolio;
- accept that the fund may underperform the market significantly in the short term in pursuit of superior long-term gains;
- are overexposed to South Africa and require an international investment;
- do not require an income from their investment.

An annual fee of 0.45% is payable. All fees exclude VAT. Fund expenses incurred in the fund include fees payable to unconnected international fund managers on a portion of assets situated offshore as well as trading, custody and audit charges. All performance information is disclosed after deducting all fees and other fund costs.

We do not charge fees to access or withdraw from the fund. More detail is available on www.coronation.com.

The Fund advanced 23.2% against a benchmark advance of 19.2% for the second quarter of the year (Q2-20), bringing the rolling 12-month performance to -6.3% against the 2.1% returned by the MSCI All Country World Index.

Global equity markets rebounded strongly during Q2-20, fuelled by unprecedented monetary and fiscal stimulus as governments and central banks acted to prevent lasting economic damage from the Covid-19 shutdown and early signs that a V-shaped recovery might be possible once quarantine restrictions are eased. Some might argue that, despite these encouraging early developments during the quarter, the stock market is detached from reality of the economic damage being wrought by the shutdown. However, in the absence of attractive alternative options, the equity markets benefitted handsomely from any positive news flow. After the upheaval in April, the oil price returned to a more normal, albeit volatile level, providing a much-needed uplift to the industry during unprecedented times.

North America was the best-performing region in the second quarter, advancing 21.7% (in US dollar terms). The weakest return was from Japan, which advanced 11.6% (in US dollar terms). Europe rose 15.6% and the Pacific ex-Japan rose 20.2% (both in US dollar terms). Emerging markets advanced 17.3% compared to developed markets, which rose 19.5% both (in US dollar terms).

Among the global sectors, information technology (IT) (+30.8%), materials (+25.1%) and consumer discretionary (+29.7%) were the best-performing sectors for the quarter. The worst-performing sectors were utilities (+5.4%), consumer staples (+7.9%) and real estate (+10.9%).

Among the global sectors, healthcare (+13.4%) and IT (+13.7%) were the most significant drivers of the index return for the quarter. The worst-performing sectors were real estate (0.6%), utilities (1.5%) and consumer staples (2.1%).

The large majority of the underlying managers had very good performance during the quarter, strongly outperforming the index.

Contrarius Global Equity rebounded 38% during the second quarter, a much-needed recovery after a poor first quarter. The manager finally admitted defeat on its oil driller exposure and sold out of these stocks during April but retained its exposure to its consumer discretionary positions. The latter decision proved a good one, with strong returns from Bed Bath & Beyond (+152%), The Michaels Company (336%), Overstock (+470%) and Macys (+40%) during the period as the US eased its lockdown restrictions. The manager still believes they are attractively valued, even after such strong returns. Materials and energy exposure from stocks such as Teck Resources (+38%), Freeport McMoran (+71%), Range Resources (+147%) and Tullow Oil (+194%) also added to the strong recovery.

Tremblant Capital also returned 39% for the quarter, benefitting from positions in Amazon (+42%), Spotify (+112%), FarFetch (+119%) and Meituan (+84%), which in turn are major beneficiaries from the effects of the Covid-19 lockdown. Tremblant’s rolling 12-month performance is an outstanding 20.5%.

Maverick Capital returned 27% after strong gains from its healthcare, consumer discretionary and tech names. Companies such as Atara Biotherapeutics (+71%), Facebook (+36%), B&M Europe Retail (+44%), Restaurant Brands (+38%) and Microsoft (+29%) are all doing well from the lockdown or recovering from the easing thereof.

Coronation Global Emerging Market Fund had a good quarter, finishing ahead of both the All Country World Index and its own Emerging Market Index. Egerton Capital was also slightly ahead of the index, while Coronation Global Equity Select marginally underperformed over the quarter.

Landsdowne Developed Markets had another disappointing quarter, with its exposure to airlines and UK banks being a source of volatility. Airlines are still struggling to work through the effects of the Covid-19 crisis and face a long recovery. However, many are taking advantage to reset their cost base (in the case of legacy businesses) and rightsize their fleets for the future. There is evidence of a strong demand for air travel even at this time and further easing of restrictions will allow for further recovery while current valuations would point to meaningful upside potential.

Outlook

At the time of writing, the MSCI World Index is around 8.5% off its mid-February high, despite uncertainty surrounding the path of the Covid-19 pandemic and the future recovery of the global economy. The early signs are encouraging, but there is much debate about whether the recovery will be V-shaped or take much longer. Governments have stepped in to protect jobs, but it remains to be seen at what level unemployment will settle as people move from being furloughed to simply unemployed as state support is withdrawn. Meanwhile, the pandemic is still ongoing and on the rise, especially in the United States and South America. There is little advance on therapeutics to treat the disease and a vaccine is still months away. There is a lot to be concerned about and there are bound to be pockets of volatility in the months ahead. This, however, lends itself to a bottom-up, stock picking strategy such as that followed by our underlying managers and we expect that this will be rewarded over the longer term.

IMPORTANT INFORMATION THAT SHOULD BE CONSIDERED BEFORE INVESTING IN THE CORONATION GLOBAL OPPORTUNITIES EQUITY FUND OF FUNDS

The Global Opportunities Equity Fund of Funds should be considered a long-term investment. The value of units may go down as well as up, and therefore Coronation does not make any guarantees with respect to the protection of capital or returns. Past performance is not necessarily an indication of future performance. The fund is mandated to invest up to 100% of its portfolio into foreign securities and may as a result be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A fund of funds invests in collective investment schemes that levy their own fees and charges, which could result in a higher fee structure for this fund. The top holdings are not reflected on a look-through basis. Coronation reserves the right to close the fund to new investors if we deem it necessary to limit further inflows in order for it to be managed in accordance with its mandate. Unit trusts are allowed to engage in scrip lending and borrowing. Coronation Global Fund Managers (Ireland) Limited is authorised in Ireland and regulated by the Central Bank of Ireland. The fund is approved under Section 65 of the Collective Investment Schemes Control Act by the Financial Sector Conduct Authority of South Africa. Portfolio managed by Coronation International Limited, a firm authorised and regulated by the Financial Conduct Authority. Portfolio managed by Coronation International Limited, a firm authorised and regulated by the Financial Conduct Authority.

JP Morgan (Ireland) has been appointed as the fund’s trustees (www.jpmorgan.com; t: +353-1-612-4000), and its custodian is JP Morgan Administration Services (Ireland) Limited (www.jpmorgan.com; t: +353-1-612-4000). Coronation is a full member of the Association for Savings & Investment SA (ASISA).

HOW ARE UNITS PRICED AND AT WHAT PRICE WILL MY TRANSACTION BE EXECUTED?

Unit trusts are traded at ruling prices set on every business day. Fund valuations take place at approximately 17:00 each business day (Irish Time) and forward pricing is used. Instructions must reach Coronation before 12:00 (SA Time) one day prior to the dealing date. You can expect to receive withdrawal payouts three business days after the dealing day. Large investments or redemptions (exceeding 5% of fund value) may be subject to an anti-dilution levy to defray dealing costs and expenses. This levy, where applicable, is applied fully for the benefit of the fund.

HOW WAS THE PERFORMANCE INFORMATION INCLUDED IN THIS FACT SHEET CALCULATED?

Performance is calculated by Coronation as at the last day of the month for a lump sum investment using Class P NAV prices. Class A NAV prices were used for the period prior to the launch of Class P. All underlying price and distribution data are sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

WHAT IS THE TOTAL EXPENSE RATIO (TER) AND TRANSACTION COSTS (TTC)?

TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER charged by any underlying fund held as part of a fund’s portfolio is included in the fund expenses portion of the TER, but trading and implementation costs incurred in managing the fund are excluded. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. The 1 year TER is for the 12 months to end of September 2019 (updated annually). The 3 year TER is for a rolling 36-month period to the last quarter end (December, March, June and September).

Transaction costs are a necessary cost in managing a fund and impacts the fund’s return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The Total Investment Charge is the sum of the Total Expense Ratio (TER) and transaction costs.

ADVICE AND PLATFORM COSTS

Coronation does not provide financial advice. If you appoint an adviser, advice fees are contracted directly between you and the adviser. For more information please contact the relevant platform (Linked Investment Service Provider or Life Assurance Provider).

WHERE CAN I FIND ADDITIONAL INFORMATION?

Additional information such as daily fund prices, brochures, application forms and a schedule of fund fees and charges is available on www.coronation.com. You will also find additional information on the considerations pertinent to investing in a fund denominated in a foreign currency and domiciled in an offshore jurisdiction.

IMPORTANT INFORMATION REGARDING TERMS OF USE
