

Orbis Optimal

When the world hit pause in 2020, biotech stocks hit fast-forward. Investors chased pandemic-era breakthroughs, funnelling capital toward innovation and the promise of attractive returns. Since then, however, sentiment has sharply cooled, giving rise to what many now call the “biotech winter” as investors take their enthusiasm to warmer sectors. For bottom-up contrarians like Orbis, this chill is exhilarating—the colder the sentiment, the greater the potential for discounts to intrinsic value.

Biotechnology sector fell out of investor favour after the COVID surge

MSCI World Biotechnology Index Vs MSCI World Index, 10-year rolling relative returns (annualised)

At its core, biotechnology is the art of turning cutting-edge science—and large amounts of capital—into medicines. For investors, long-term returns hinge on two factors. First, how actual drug sales stack up against the market’s expectations. Second, the incremental returns on each additional R&D dollar invested. Businesses that excel at both compound capital; those that stumble destroy it.

Therefore, when researching biotech companies, we tilt the odds in our favour by placing emphasis on two essentials: identifying underappreciated drugs and backing disciplined management teams that have a proven ability to allocate capital effectively. The Orbis Optimal Strategy holds four companies we find to be rare businesses that embody these traits, and trade at undemanding valuations. In our view, leaving limited downside and outsized upside.

Genmab

Distinguished by its proven antibody discovery engine that has yielded eight approved medicines, Genmab is approaching patent expirations for its flagship product, Darzalex, in the late 2020s and early 2030s. Investors routinely flee when a patent cliff looms, fixating on the certain loss of legacy revenue while discounting whatever might replace it. Genmab sits squarely in that sentiment trough. Today the price of its shares hovers around 70% of the value of already-approved drugs, implying the world-class pipeline and discovery engine are worth nothing.

Meanwhile, a slate of late-stage assets and a growing roster of partnered drugs are only beginning to contribute revenue, with sales and royalties that extend well into the 2030s. The R&D machine is still run by its scientist-founder, Dr Jan van de Winkel, whose more than two-decade tenure and sizeable equity stake have fostered disciplined capital allocation and scientific excellence. The company’s recent acquisition of ProfoundBio adds antibody-drug-conjugate technology that slots neatly into Genmab’s core expertise, expanding the opportunity set without stretching the balance sheet. Yet, the market still treats Genmab as a single-product story, allowing investors to buy the stock at a price that’s lower than the value of its commercialised drugs’ cash flows alone and get a world-class discovery platform for free.

Alnylam Pharmaceuticals

This company stands at the forefront of RNA-interference (RNAi) therapeutics, a technology capable of silencing specific gene expressions and reducing harmful proteins. After decades of development, RNAi has proven safe and efficacious in serious diseases like Transthyretin amyloid cardiomyopathy (ATTR-CM). Each of Alnylam’s four marketed medicines and two partnered medicines were invented in-house—a remarkable R&D productivity streak highlighting its scientific prowess.

Earlier this year the company received regulatory approval for its next-generation ATTR-CM medicine, Amvuttra. We believe Amvuttra represents a best-in-class treatment that will significantly benefit patients.

Orbis Optimal (*continued*)

While the drug is still in the early stages of its launch, our research suggests that Amvuttra's sales will outpace consensus expectations. Alnylam's management team, steered by its CEO Dr Yvonne Greenstreet, has a solid track record of both scientific rigour and commercial execution. A stronger than expected Amvuttra sales ramp should propel Alnylam to profitability this year and cement its status among biotech giants like Vertex and Gilead.

CRISPR Therapeutics

Five years ago CRISPR was a popular stock among growth-oriented investors, known for pioneering CRISPR (Clustered Regularly Interspaced Short Palindromic Repeats) gene-editing technology. However, the biotech sentiment implosion has been so profound that we can now buy CRISPR at a significant discount to just the cash on its balance sheet plus the value of its commercialised therapy, Casgevy, which is used to treat sickle-cell disease and transfusion-dependent β -thalassemia.

Guided by scientist-CEO Dr Samarth Kulkarni, CRISPR Therapeutics became the first company to get a CRISPR-based therapy approved by regulators. Because every patient must clear eligibility screens, undergo stem-cell harvesting, and be treated at a steadily expanding network of specialised centres, uptake follows a measured, step-like curve, unlike conventional drugs that generate revenue almost immediately after approval. Our market assessment suggests Casgevy is a multibillion-dollar opportunity with a strong competitive position and no visible patent cliff. And partnering with Vertex gives Casgevy the commercial muscle it deserves while allowing CRISPR to remain research-focused. Despite this, the market's expectations remain muted, constrained by the therapy's unusual launch trajectory. That disconnect in share price is magnified by the company's healthy balance sheet: management raised substantial capital when financing was readily accessible, enabling CRISPR to keep funding high-upside research while many peers are slashing budgets.

Insmed

The newest addition to our biotech holdings, Insmed, is awaiting FDA approval for brensocatib in bronchiectasis, a chronic lung disease whose patients currently lack therapeutic treatment options and suffer a quality-of-life burden comparable with chronic obstructive pulmonary disease. We anticipate a rapid adoption curve that will push the company toward sustained profitability.

The attraction, however, goes well beyond one drug. A second pipeline asset, TPIP, just delivered what could be described as best-case scenario Phase 2 data in pulmonary arterial hypertension. With an already approved medicine, ARIKAYCE, that is indicated for the treatment of Mycobacterium avium complex lung disease, the anticipated approval of brensocatib and later TPIP (assuming successful clinical trials), Insmed is building a respiratory disease franchise. This type of disease-focused strategy has proven lucrative for other biotech companies in the past.

Despite a recent rally following TPIP's positive results, shares remain well below our estimate of their intrinsic value, leaving substantial room for multi-year appreciation. Insmed is led by its long-time CEO Will Lewis, who took the helm when the company's market capitalisation was under \$100 million. During his tenure, the company has created significant shareholder value through disciplined R&D bets. A continuation of this strategy should lead to further value creation that the market is not pricing into the shares.

The current environment of widespread scepticism and low valuations in the biotech sector is precisely the climate which contrarian investors like us find appealing. It has allowed us to assemble a portfolio of companies that we believe are exceptional. Not only are they advancing groundbreaking science and delivering life-changing therapies for patients, but they are also led by management teams we deeply respect and admire. While there will no doubt be surprises and inevitable setbacks along the way, we have established positions in these companies at prices that, in our view, provide a wide margin of safety. These businesses are well equipped to weather the current biotech winter, and when the thaw arrives, we believe they are ideally poised to deliver rewarding long-term returns for Orbis clients.

Commentary contributed by Povilas Dapkevicius and Mo Zhao, Orbis Portfolio Management (Europe) LLP, London

This report does not constitute a recommendation to buy, sell or hold any interests, shares or other securities in the companies mentioned in it nor does it constitute financial advice.

Orbis Optimal SA Fund

US\$ Standard Class

The Fund seeks capital appreciation in US dollars on a low risk global portfolio. It invests principally in a focused portfolio of selected global equities believed to offer superior relative value and employs stockmarket hedging to reduce risk of loss.

Inception date	1 January 2005		
Number of shares	US\$ Standard Class:	39,881,649	Euro Standard Class: 15,703,563
Income distributions during the last 12 months	None		

Fund Objective and Performance Fee Benchmarks

The Fund is designed for investors seeking capital appreciation on a low risk global investment portfolio. The Fund's returns are intended to be largely independent of the returns of major asset classes such as cash, equities and bonds. The Fund's US\$ Share Classes aim to outperform US\$ Bank Deposits (compound total returns on one month US\$ deposits, currently based on the Bloomberg USDRA rate), while its Euro Share Classes aim to outperform Euro Bank Deposits (compound total returns on one month Euro Deposits, currently based on the Bloomberg EUDRA rate).

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and augments a focused portfolio of selected global equities with hedging of the risk of monetary loss arising from a decline in stockmarkets. It invests in shares considered to offer superior fundamental value. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. Orbis believes that over the long term, equity invested based on this approach offers superior returns and reduces the risk of loss.

Orbis believes the main risk of investing in its selected equities is that their prices will decline if relevant stockmarkets fall significantly. To reduce this risk, the Fund maintains a substantial core level of hedging. When Orbis' research suggests that stockmarkets are overvalued and vulnerable, the Manager increases the hedging above this core level. Similarly, when Orbis' research suggests that stockmarkets represent good value, the Manager lowers the hedging below the core level. The Manager's actions in this regard are limited and the Fund therefore always maintains a significant level of hedging to protect investors from unexpected stockmarket declines. The result is that the Fund's returns are driven mainly by the Manager's ability to select equities that outperform their respective stockmarket indices and not by the overall direction of equity markets. The Fund is therefore able to aim for absolute (or positive) returns.

Since inception and over the latest ten- and five-year periods, both the US\$ and Euro Standard Classes have outperformed their respective performance fee benchmarks net of fees and delivered positive returns.

Risk/Reward Profile

- The Fund is designed for investors seeking capital appreciation on a low risk global investment portfolio.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Manager generally assesses an equity investment's attractiveness using a three-to-five year time horizon.

Management Fee

The Fund's share classes bear different management fees. The fees are designed to align the Investment Manager's interests with those of investors in the Fund.

There are two parts to the fee applicable to the Standard Share Classes.

- a base fee of 1.0% per annum, paid monthly, of the total net assets of each Standard Share Class; plus
- a performance fee of 20% of the outperformance of each class of Standard share's daily rate of return relative to its performance fee benchmark (as described in the "Fund Objective and Performance Fee Benchmarks" section above), calculated and accrued on each dealing day and paid monthly. The performance fee incorporates a high water mark.

Please review the Fund's prospectus for additional detail and for a description of the management fee borne by the Fund's other share classes.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling investments. However, the Manager has agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to each share class will be capped at 0.15% per annum. The cap will be automatically extended for further successive one year periods unless terminated by the Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's fees described above under "Management Fee," the cost of buying and selling investments, interest and brokerage charges.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.50% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns.

Orbis Optimal SA Fund

Annual General Meeting

Notice is hereby given that the Annual General Meeting of Orbis Optimal SA Fund Limited (the “Company”) will be held at the offices of Orbis Investment Management Limited, Orbis House, 25 Front Street, Hamilton HM 11, Bermuda on 29 September 2025 at 10:00 am. Members are invited to attend and address the meeting. The Agenda will comprise the following:

- Review of Minutes of the Annual General Meeting of Members of the Company held on 30 September 2024
- Review of the 2025 audited financial statements
- Appointment of the Directors of the Company
- Approval of Directors’ fees for the year to 30 June 2026
- Proposed re-appointment of Ernst & Young as Auditors for the year to 30 June 2026

By Order of the Board, Katharine Summerley, Secretary

Additional Information

South African residents should contact Allan Gray Unit Trust Management (RF) Proprietary Limited at 0860 000 654 (toll free from within South Africa) or offshore_direct@allangray.co.za to receive, free of charge, additional information about a proposed investment (including Prospectus, application forms, annual reports and a schedule of fees, charges and maximum commissions). The Manager can be contacted at +1 441 296 3000 or clientservice@orbis.com. The Fund’s Custodian is Citibank N.A., New York Offices, 388 Greenwich Street, New York, New York 10013, U.S.A. All information provided herein is subject to the more detailed information provided in the Fund’s Prospectus.

Share Price and Transaction Cut Off Times

Share prices are calculated for the Investor Share Class(es), on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each Thursday (or, if a Thursday is not a business day, the preceding business day), (b) on the last business day of each month and/or (c) any other days in addition to (or substitution for) any of the days described in (a) or (b), as determined by the Investment Manager or Manager (as indicated in the Fund’s prospectus) without notice. Share prices are calculated for the (i) Standard Share Class(es), (ii) Standard Share Class(es) (A), (iii) Shared Investor Refundable Reserve Fee Share Class(es) and (iv) Shared Investor Refundable Reserve Fee Share Class(es) (A) on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each business day and/or (b) any other days in addition to (or substitution for) any of the days described in (a), as determined by the Investment Manager or Manager (as indicated in the Fund’s prospectus) without notice.

Subscriptions are only valid if made on the basis of the Fund’s current Prospectus. To be processed on a given dealing day: subscription requests into an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm on that dealing day; subscription requests into an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; redemption requests from an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 12 noon; redemption requests from an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is also not an Orbis SICAV Fund must be submitted by 12 noon; requests to switch from an Orbis SICAV Fund into a different Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is an Orbis SICAV Fund must be submitted by 12 noon; and requests to switch from an Orbis Fund that is an Orbis SICAV Fund to a different Orbis Fund that is also an Orbis SICAV Fund must be submitted by 5:30 pm. All times given are Bermuda time, and all requests must be properly completed and accompanied by any required funds and/or information.

Share prices, updated every dealing day, are available:

- for the Shared Investor RRF Share Class(es) (A) and Standard Share Class(es) (A), from the Allan Gray Unit Trust Management (RF) Proprietary Limited’s website at www.allangray.co.za, and
- for the Shared Investor RRF Share Class(es), Standard Share Class(es), and Investor Share Class(es), from the Orbis website at www.orbis.com.

Weekly prices can be obtained via e-mail, by registering with Orbis for this service at the Orbis website at www.orbis.com.

Legal Notices

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 or €10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/ share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. The Manager provides no guarantee with respect to capital or the Fund’s returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors’ performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund’s net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund’s Manager. Information in this Report is based on sources believed to be accurate and reliable and provided “as is” and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. To the maximum extent permitted by applicable law, the Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund’s Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The latest average fund indices provided by Morningstar are for 24 June 2025. To allow comparison of returns to a common date we have extended the average equity and multi-asset class fund indices to reflect the subsequent movement of the applicable benchmark indices. For the purposes of extending the Average Global Equity Fund Index as a comparator of the Orbis Optimal SA Fund, the FTSE World Index has been used. Average fund returns are not shown for periods of a month or less as high price volatility and late fund reporting regularly cause them to be significantly restated by Morningstar.

Total Rate of Return for Bank Deposits is the compound total return for one-month interbank deposits in the specified currency. Beta Adjusted Exposure is calculated as Equity Exposure multiplied by a Beta determined using Blume’s technique, minus Portfolio Hedging.

Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding. The Fund does not seek to mirror the investment universe of the Benchmark and is thus not constrained by the Benchmark's composition.

Risk measures are ex-post and calculated on a monthly return series. Drawdowns occur when the cumulative return of the Fund drops below its preceding peak. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

Beta compares the sensitivity of the periodic returns of a fund to those of an index. A beta of 1.0 implies that a percentage move in the index has been reflected by a similar percentage move in the fund, on average. A beta higher than 1.0 implies that a fund has proportionally more exposure to market volatility than the index.

Annualised Monthly Volatility measures the variability of monthly returns, adjusted to reflect an annual level. A higher value suggests greater volatility and risk, while a lower value indicates more stable returns.

Tracking error is a measure of the difference between a fund's return and the return of its benchmark. Low tracking error indicates that the fund is closely following its benchmark. High tracking error indicates the opposite.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Cash, cash equivalents and short-term government securities are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Balanced Funds differ from their respective benchmark's holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Balanced Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Balanced Funds hedge stock and bond market exposure, the active share calculations are "gross" and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 30 June 2025.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds' Prospectus.

Additional Notices

This is a marketing communication for the purposes of the Bermuda Monetary Authority's investment business rules and ESMA guidelines on marketing materials. You should consider the relevant offering documents including the Fund Prospectus and Key Information document (for a SICAV Fund) before making any final investment decisions. These offering documents are available in English on our website (www.orbis.com). Please refer to the respective Fund's Prospectus for full information on the risks associated with investing.

Investors in a SICAV Fund can obtain a summary of their investor rights in English on our website (www.orbis.com). When investing in the Orbis Funds an investor acquires shares within the Fund and not in the underlying assets held within the Fund. The return of your investment may change as a result of currency fluctuations if the return is calculated in a currency different from the currency shown in this Report.
