

Orbis Japan Equity

It's been a rollercoaster of a quarter for investors in Japan. A sharp 14% drop following Trump's tariff announcement in early April, followed by an almost as steep recovery, has left the TOPIX marginally higher than where it started the year.

In the 2 April announcement, Japanese exporters to the US were slapped with a 24% blanket tariff. While the level of the tariff was quickly pared back to 10% as negotiations took place, elevated levies remain on certain products: 50% on steel and aluminium imports, and 25% on autos and auto parts. With a stockmarket that has a number of exporting heavyweights with meaningful exposure to the US, the impact of tariffs in Japan could be severe.

In contrast to the ride taken by the broader market, the experience for investors in the Orbis Japan Equity Strategy has been much smoother. The Strategy has delivered strong absolute and relative returns, and in particular, protected client capital on days when the market fell sharply. As a result, it has outpaced its benchmark by roughly 10% year-to-date.

A key driver of this outperformance has been the portfolio's pronounced underweight to Japan's exporters and its corresponding overweight to domestically-oriented names, which helped the Strategy sidestep much of the tariff-related volatility. The portfolio's overweight to mid-cap names has also been beneficial, as larger-cap and mega-cap stocks have lagged over the period.

But zooming out, the recent outperformance of domestic and mid-cap stocks looks more like a short-term blip. Over the medium-term, domestically-oriented businesses have underperformed both the exporters and financials, and mid-cap stocks have significantly trailed their large- and mega-cap counterparts.

Mid-caps and domestics have lagged over the medium term

Cumulative relative return vs Topix, since January 2019

Source: Orbis, LSEG Datastream, Bloomberg. Cumulative total return with gross dividends rebased to 100 at 1 Jan 2019. Statistics are compiled from an internal research database and are subject to subsequent revision due to changes in methodology or data cleaning. In each case, calculated first at the stock level and then aggregated using a weighted mean. "Domestics / defensives", "Exporters / cyclical", and "Financials" include constituents of 11, 18, and 4 sectors within the TOPIX, respectively, that display those characteristics.

In our view, this leaves plenty of room for this year's trends to persist. The yen's extreme cheapness relative to historical levels—and therefore its potential for appreciation—has pushed our overweight to domestically-oriented companies to its highest level since the inception of the Orbis Japan Equity Strategy. While the currency has strengthened somewhat year-to-date, it remains historically weak, and we continue to believe that many of Japan's exporters have been over-earning.

This quarter's tariff news—and the broader uncertainty it has introduced for exporters—has only reinforced our conviction in domestically-oriented stocks. While we claim no special insight into what policy might emerge next, the distribution of potential outcomes seems skewed toward the negative. Faced with tariffs, exporters face a menu of tough choices: either absorb tariffs and compress their margins, raise prices and suppress sales volumes, or incur substantial costs by moving production abroad. Even if companies do choose to move production elsewhere, such a transition would take years. Making such a decision in an environment where

Orbis Japan Equity (*continued*)

policy changes are predictable would be tough enough, but it's hard to say what tariffs might look like next week, let alone over the next decade.

As a result, the Orbis Japan portfolio has limited exposure to companies that would be impacted by further negative news on tariffs and the exporters that would suffer should the yen continue to strengthen. Among the shares that we do own with overseas exposure, most have limited US exposure and some could even benefit from tariffs. Others are more idiosyncratic, with tailwinds for growth that should endure despite tariffs, or are companies that can benefit from improved capital allocation initiatives.

Yamato Kogyo, a steelmaker, is a company that at first glance may seem most at risk—particularly with US steel tariffs climbing to 50%. Yet in reality, most of Yamato's profits come from a US-based joint venture with Nucor, and all of this venture's production is domestic to the US. Far from being a headwind, increased protection for US-made steel could actually improve Yamato's competitive position. The company also has a large pile of cash on its balance sheet worth close to 40% of its market cap and is increasingly returning this cash to shareholders through rising dividend payouts and share buybacks. Asahi, the brewer, is also a company with a large offshore business, but one with negligible exposure to the US. Outside of Japan, its key businesses are in Europe and Australia, where it generates a large amount of free cash flow. In the company's recently released medium term plan, they announced an intention to return more of this cash to shareholders through increased share buybacks.

Sumitomo Electric Industries is an example of a company where tariff uncertainty could be a cloud over the stock in the short-term. The company makes wire harnesses for cars—akin to a vehicle's central nervous system—and is therefore at risk of any slowdown in auto production due to tariffs. However, over the longer-term, the company is well positioned to benefit from the increasing electrical content of vehicles which require more wiring, connectors and sensors than in the past. The company is also becoming much less reliant on the auto industry, growing earnings in other areas such as its Environment & Energy business, where it sells high voltage cables and other power equipment, and its Info-communications businesses where its energy-efficient optical devices are in increasingly high-demand as datacentre operators build out capacity for generative AI.

Stanley Electric and Koito Manufacturing, which make lights for cars, also could suffer from a downturn in Japan's autos sector. While both face some near-term earnings risk, Stanley and Koito each have a huge amount of cash on their balance sheets. Encouragingly, both companies have begun returning cash to shareholders in the form of share buybacks. Koito has committed to returning more than half of its market cap over the next four years, and Stanley recently announced its largest ever buyback, amounting to close to 20% of its shares.

While we own a small number of stocks with indirect autos exposure, the portfolio has negligible direct exposure to Japan's autos sector. The industry looks particularly exposed to negative tariff news. Automakers appear to be swallowing some of the cost, and while price increases may have some benefit, it could come at the expense of sales volumes. Either way, we believe profitability for the carmakers is likely to suffer. Japanese automakers have also fallen behind Chinese peers in the development of EVs, and most have begun losing market share across Southeast Asia.

Overall, our shift away from exporters and companies exposed to US tariffs means that more than 75% of the portfolio is now invested in domestically-oriented names. Taken together, the portfolio today looks very different from its benchmark. Portfolio beta has fallen to an all-time low, at less than 0.8. Should we continue to see further market turmoil, increased uncertainty with the potential for tariffs, a weakening dollar and appreciating yen—as we have so far this year—we expect the portfolio to continue to protect client capital and deliver strong relative returns.

Commentary contributed by Brett Moshal, Orbis Portfolio Management (Europe) LLP, London

This report does not constitute a recommendation to buy, sell or hold any interests, shares or other securities in the companies mentioned in it nor does it constitute financial advice.

Orbis SICAV Japan Equity (Euro) Fund

Investor Share Class

The Fund is actively managed and designed to be exposed to all of the risks and rewards of selected Japanese equities and seeks higher returns than the Japanese stockmarket, without greater risk of loss. Currency exposure is predominantly hedged into euro. The fund benchmark ("Benchmark") is the Tokyo Stock Price Index, including income, gross of withholding taxes ("TOPIX"), hedged into euro.

Number of shares (Investor Share Class)	Yen Class:	4,247,469	Euro Class: 475,014
Income distributions during the last 12 months	None		

Fund Objective and Benchmarks

The Yen Classes of the Fund seek higher returns in yen than the Japanese stockmarket, without greater risk of loss. The Euro Class of the Fund seeks higher returns than the Japanese stockmarket hedged into euro, without greater risk of loss. The TOPIX measured in Japanese yen (including income and before deduction of withholding taxes) (the "TOPIX Yen") is the Yen Class' benchmark, while the TOPIX Yen hedged into euro (the "TOPIX Euro") is the benchmark of the Euro Class.

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and is designed to be exposed to all of the risks and rewards of selected Japanese equities. The Fund identifies as Japanese equities those equities of companies which are domiciled in Japan, whose securities trade on a Japanese stockmarket or whose business is primarily located in or linked to Japan. These equities are selected using extensive proprietary investment research undertaken by the Investment Manager and its investment advisors. Orbis devotes a substantial proportion of its business efforts to detailed "bottom up" investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss.

All share classes invest in a portfolio of Japanese equities selected by the Investment Manager. However, while the currency exposure of the Yen Classes remains as fully exposed to the yen as practicable, the Euro Class is hedged into, and therefore largely exposed to, the euro. The Euro Class is designed for investors who measure their returns in euro and who wish to be invested in Japanese equities without being exposed to fluctuations in the yen-euro exchange rate. In addition, the Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund's investment objective.

The Fund does not seek to mirror the TOPIX Yen/TOPIX Euro and may deviate meaningfully from them in pursuit of superior long-term capital appreciation.

Since inception and over the latest ten- and five-year periods, both the Yen and Euro Classes have outperformed their respective benchmarks net of fees. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Fund is aimed at investors who are seeking a portfolio the objective of which is to invest in, and be exposed to Japanese equities.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment's attractiveness using a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are

designed to align the Manager's and Investment Manager's interests with those of investors in the Fund. With respect to the Investor Share Classes, the fee is based on the net asset value of the Class. The fee rate is calculated weekly by comparing the Yen Class' performance over three years against the TOPIX Yen. For each percentage point of three year performance above or below that performance, 0.04 percentage points are added to or deducted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

Please review the Fund's prospectus for additional detail and for a description of the management fee borne by the Fund's other share classes.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. However, the Manager and the Investment Manager have agreed that in the current calendar year, except for specified exclusions, operating expenses attributable to the Fund's Investor Share Classes will be capped at 0.20%. Please refer to the Fund's Prospectus for a description of the fee cap applicable to its other share classes. Each cap will be automatically extended for further successive one year periods unless terminated by the Manager or the Investment Manager at least three months prior to the end of the then current term. The operating expenses that are capped are all expenses, excluding the Manager's and Investment Managers' fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges, and certain taxes.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.25% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Orbis SICAV Semi-Annual Report

This report contains only some of the information included in the semi-annual report of the Orbis SICAV (the “Company”) as at 30 June 2025. The semi-annual report will be available upon request and free of charge at the registered office of the Company within two months following 30 June.

Additional Information

South African residents should contact Allan Gray Unit Trust Management (RF) Proprietary Limited at 0860 000 654 (toll free from within South Africa) or offshore_direct@allangray.co.za to receive, free of charge, additional information about a proposed investment (including Prospectus, application forms, annual reports and a schedule of fees, charges and maximum commissions). The Investment Manager can be contacted at +1 441 296 3000 or clientservice@orbis.com. The Fund's Depositary is Citibank Europe plc, Luxembourg Branch, 31 Z.A. Bourmicht, L-8070 Bertrange, Luxembourg. All information provided herein is subject to the more detailed information provided in the Fund's Prospectus.

Share Price and Transaction Cut Off Times

Share prices are calculated for the Investor Share Class(es), on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each Thursday (or, if a Thursday is not a business day, the preceding business day), (b) on the last business day of each month and/or (c) any other days in addition to (or substitution for) any of the days described in (a) or (b), as determined by the Investment Manager or Manager (as indicated in the Fund's prospectus) without notice. Share prices are calculated for the (i) Standard Share Class(es), (ii) Standard Share Class(es) (A), (iii) Shared Investor Refundable Reserve Fee Share Class(es) and (iv) Shared Investor Refundable Reserve Fee Share Class(es) (A) on a net asset value basis by share class, normally as of 5:30 pm (Bermuda time), (a) each business day and/or (b) any other days in addition to (or substitution for) any of the days described in (a), as determined by the Investment Manager or Manager (as indicated in the Fund's prospectus) without notice.

Subscriptions are only valid if made on the basis of the Fund's current Prospectus. To be processed on a given dealing day: subscription requests into an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm on that dealing day; subscription requests into an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; redemption requests from an Orbis Fund that is not an Orbis SICAV Fund must be submitted by 12 noon; redemption requests from an Orbis Fund that is an Orbis SICAV Fund must be submitted by 5:30 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is also not an Orbis SICAV Fund must be submitted by 12 noon; requests to switch from an Orbis SICAV Fund into a different Orbis Fund that is not an Orbis SICAV Fund must be submitted by 5:00 pm; requests to switch from an Orbis Fund that is not an Orbis SICAV Fund to a different Orbis Fund that is an Orbis SICAV Fund must be submitted by 12 noon; and requests to switch from an Orbis Fund that is an Orbis SICAV Fund to a different Orbis Fund that is also an Orbis SICAV Fund must be submitted by 5:30 pm. All times given are Bermuda time, and all requests must be properly completed and accompanied by any required funds and/or information.

Share prices, updated every dealing day, are available:

- for the Shared Investor RRF Share Class(es) (A) and Standard Share Class(es) (A), from the Allan Gray Unit Trust Management (RF) Proprietary Limited's website at www.allangray.co.za, and
- for the Shared Investor RRF Share Class(es), Standard Share Class(es), and Investor Share Class(es), from the Orbis website at www.orbis.com.

Weekly prices can be obtained via e-mail, by registering with Orbis for this service at the Orbis website at www.orbis.com.

Legal Notices

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a ¥10,000 or €10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/ share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Information in this Report is based on sources believed to be accurate and reliable and provided “as is” and in good faith. The Orbis Group does not make any representation or warranty as to accuracy, reliability, timeliness or completeness of the information in this Report. To the maximum extent permitted by applicable law, the Orbis Group disclaims all liability (whether arising in contract, tort, negligence or otherwise) for any error, omission, loss or damage (whether direct, indirect, consequential or otherwise) in connection with the information in this Report.

Fund Information

Prior to 29 November 2002 the Investor Share Class of the Orbis SICAV Japan Equity (Yen) Fund was a British Virgin Islands investment company, Orbis Japan Equity (Yen) Fund Limited.

Fund Minimum

Minimum investment amounts in the Fund are specified in the Fund's Prospectus, provided that a new investor in the Orbis Funds must open an investment account with Orbis, which may be subject to minimum investment restrictions, country restrictions and/or other terms and conditions. For more information on opening an Orbis investment account, please visit www.orbis.com.

Clients investing via Allan Gray, which includes the Allan Gray Investment Platform, an Allan Gray investment pool or otherwise through Allan Gray Nominees, remain subject to the investment minimums specified by the applicable terms and conditions.

Sources

TOPIX: JPX Market Innovation & Research, Inc. TOPIX hedged into US\$ and euro are calculated by Orbis using an industry-standard methodology using the TOPIX which is in yen. No further distribution of the TOPIX data is permitted.

Such information (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The latest average fund indices provided by Morningstar are for 24 June 2025. To allow comparison of returns to a common date we have extended the average equity and multi-asset class fund indices to reflect the subsequent movement of the applicable benchmark indices. Average fund returns are not shown for periods of a month or less as high price volatility and late fund reporting regularly cause them to be significantly restated by Morningstar.

Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding. The Fund does not seek to mirror the investment universe of the Benchmark and is thus not constrained by the Benchmark's composition.

Risk measures are ex-post and calculated on a monthly return series. Drawdowns occur when the cumulative return of the Fund drops below its preceding peak. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

Beta compares the sensitivity of the periodic returns of a fund to those of an index. A beta of 1.0 implies that a percentage move in the index has been reflected by a similar percentage move in the fund, on average. A beta higher than 1.0 implies that a fund has proportionally more exposure to market volatility than the index.

Annualised Monthly Volatility measures the variability of monthly returns, adjusted to reflect an annual level. A higher value suggests greater volatility and risk, while a lower value indicates more stable returns.

Tracking error is a measure of the difference between a fund's return and the return of its benchmark. Low tracking error indicates that the fund is closely following its benchmark. High tracking error indicates the opposite.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Cash, cash equivalents and short-term government securities are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Balanced Funds differ from their respective benchmark's holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Balanced Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Balanced Funds hedge stock and bond market exposure, the active share calculations are "gross" and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 30 June 2025.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds' Prospectus.

Additional Notices

This is a marketing communication for the purposes of the Bermuda Monetary Authority's investment business rules and ESMA guidelines on marketing materials. You should consider the relevant offering documents including the Fund Prospectus and Key Information document (for a SICAV Fund) before making any final investment decisions. These offering documents are available in English on our website (www.orbis.com). Please refer to the respective Fund's Prospectus for full information on the risks associated with investing.

Investors in a SICAV Fund can obtain a summary of their investor rights in English on our website (www.orbis.com). When investing in the Orbis Funds an investor acquires shares within the Fund and not in the underlying assets held within the Fund. The return of your investment may change as a result of currency fluctuations if the return is calculated in a currency different from the currency shown in this Report.
