Fund objectives and investment policy

The fund aims to provide capital growth in excess of the MSCI World (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies worldwide that have suffered a severe set back in either share price or profitability.

Relevant risks as associated with this Fund are shown overleaf and should be carefully considered before making any investment. Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KIID.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

Exchange rate movements may cause the value of investments to fall as well as rise. Annualised Figures are calculated as geometric average to show what an investor would earn over a period of time if the annual return was compounded. Actual figures are available on request. The performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All fund performance data are on a NAV to NAV basis, net income reinvested and net of ongoing charges and transaction costs. Data is not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the ongoing charges and the portfolio transaction costs, and including the impact of any performance fees if applicable.

Benchmark and corporate action information

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (TR) index and compared against the MSCI World Value (Net TR) index and the Morningstar Global Flex-Cap Equity Category. The fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark and the MSCI World Value (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not have any bearing on how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark or the MSCI World Value (Net TR) index. The investment manager will invest in companies or sectors not included in the target benchmark or the MSCI World Value (Net TR) index in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. Any comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.
