## FUND OBJECTIVE

The Sesfikile Boutique Collective Investments Property Fund Class B2 is a portfolio which aims to deliver both a high income yield as well as capital growth over the medium to long term. Our objective is to deliver total returns (consisting of income and capital) that outperform the FTSE/JSE All Property Index (J803) over a 3 to 5 year investment horizon. The fund is suitable for investors who are looking for a viable property component to a balanced portfolio; or alternatively an investor looking for a growing income stream but is willing to be exposed to an element of capital volatility.

## MARKET REVIEW

Listed property had yet another strong month recording a total return of 7.1%. This propelled the year-to-date return to 28%, comfortably ahead of our expectations set at the beginning of the year for 21%. The sector beat alternative asset classes in August with equities shedding 1.7% and bonds gaining 1.7%. Performance was somewhat in contradiction to the major themes seen in the month. The Delta variant continued to spread rapidly across the globe with a new highly mutated variant also emerging toward the end of the month. Vaccinations were opened to 18-year-olds and while progress is being made, SA remains well below global averages with just 10% of the population fully vaccinated.

The results season gathered momentum, confirming our fears of significant pressure in the office sector, evidenced by the rising amount of space available for sublet, further adoption of WFH policies, a further delay to a return to the office due to the stubborn third wave and limited confidence in the service-based industry for expansion. Encouragingly, the domestic retail and industrial sectors, as well as a range of offshore counters with exposure to office and industrial property, are performing well.

Despite some volatility, bond yields ended flat amid signals that Fed policymakers were considering a plan to begin scaling back bond purchases in the coming months, albeit still dependent on evolving US job-market and inflation developments. In a similar vein, the ZAR ended the month largely unchanged despite spiking to ZAR 15.29/USD during the month.

Accelerate was the best performing stock in August (+52.1%) on expectations that IGroup are building a position in the counter. Fortress A gained 16.1% after the company provided some colour on its upcoming distributions which was positively received. Vukile delivered a 12.9% total return in August after it emerged that the damage to its portfolio from the unrest in July was much less than initially feared. Liberty 2 Degrees declined 6.2%, while Hammerson fell 4.8% on renewed fears of further valuation write-downs in its UK portfolio.

With the price momentum outpacing operational health, we believe that the sector is currently overvalued and a cooling off is likely in order. On the positive side, risk appetite has grown and the valuations, while full, are not excessively stretched. In addition the sector is quite well diversified as compared to years gone by and while the sector as a whole appears full, there are several pockets of opportunity.
