FUND OBJECTIVE
The Sesfikile Boutique Collective Investments Property Fund Class B2 is a portfolio which aims to deliver both a high income yield as well as capital growth over the medium to long term. Our objective is to deliver total returns (consisting of income and capital) that outperform the FTSE/JSE All Property Index (J803) over a 3 to 5 year investment horizon. The fund is suitable for investors who are looking for a viable property component to a balanced portfolio; or alternatively an investor looking for a growing income stream but is willing to be exposed to an element of capital volatility.

Investment performance is for illustrative purposes only and calculated by taking actual initial fees and ongoing fees into account for amount shown with income reinvested on reinvestment date.
FUND STRATEGY

This fund aims to outperform the benchmark by investing in listed property companies with sustainable income growth underpinned by strong property fundamentals. In addition to these core holdings, the fund makes use of tactical stock selection to capitalise on short-term market mispricing and corporate action opportunities.

INVESTMENT POLICY

The policy is to invest in JSE listed Real Estate Investment Trusts (“REITs”) or listed property companies. The investment manager will also be allowed to invest in financial instruments and cash as allowed by the act from time to time in order to achieve its investment objective. Furthermore, and as legislation permits, the manager shall be permitted to invest in offshore listed property investments on behalf of the Sesfikile BCI Property Fund.

WHY CHOOSE THIS FUND?

The fund offers active best of breed management within a sector that offers income and capital growth over time:

• All shares are subject to rigorous, in-depth research;
• While ultimate portfolio construction adheres to Sesfikile’s unique “Four D” approach:
  ▪ Our passion for direct property
  ▪ Getting stuck in the detail
  ▪ Understanding the broader drivers of property investment
  ▪ Taking views on corporate action deals and finding the hidden potential in the sector.
• Through extensive experience in the listed property sector, we believe our team has the ability to identify the key differentiators to performance and ultimately the factors that impact total returns for clients. Importantly, given our commitment to capping the total size of assets under management we will remain nimble enough to execute on investment ideas effectively over the medium to long term.
• Since inception, our investment process has been able to deliver consistent low-risk outperformance of the benchmark on an after fee basis. Although this is no guarantee of future performance, we are confident in our robust investment and risk management process and alignment of interest with clients will consistently steer us towards identifying value added investment opportunities.

MARKET REVIEW

July, like June, started strong in the first few days of the month (up just over 6% at the peak) only to end the month over 3% in the red. Countercintuitively, the 10-year bond yield was positively correlated to property prices spiking from 9.4% to 9.8% in the first week of the month only to subside back to 9.4% by month end, leaving bonds up 0.6% for the period. Equities on the other hand had another strong month up 2.6% as resource counters rallied.

Globally the headlines are still dominated by Covid-19, be it the stimulus packages or the race for the vaccine; both of which have supported markets. European leaders agreed on a EUR 750 billion stimulus package, while South Africa has also managed to negotiate a USD 4.3 billion loan from the IMF. On the medical front at least seven vaccine candidates have entered stage 3 trials with two expecting results before year end. Despite the drive ahead in stimulating economies and looking for a treatment, the world appears to be falling into a deep recession.

Locally the lockdowns (although warranted) have battered the already beleaguered consumer as unemployment continues to reach new all-time highs. And once most of us had forgotten the woes of Eskom, load shedding returned, albeit to a lesser extent than we experienced pre-Covid-19. On the positive front, the Reserve Bank cut rates by a further 25 basis points to an all-time low and Edcon has seen an offer for most of its business by two parties, namely Foschini and Retailability.

Company results were few; just Liberty 2 Degrees and Accelerate, both of whom reiterated the extremely weak operating environment, especially in retail and hospitality.

Valuations are still attractive and offer value in a depressed market, however we still feel that many market commentators are perhaps still a bit too optimistic regarding upcoming company results and the speed of the economic recovery. This is a buying opportunity but there will be a chance to buy into further dips as data (both economic and company related) are released in the upcoming months.
TER AND TRANSACTION COST (INCL. VAT)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31st August 2019, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 31 March 2020.
